CLASS SCENE: Pictured is a scene taken during an art class at the college.

Art Class Students Go Through Experiments

By MRS. MARTINE BARKER, Art Instructor, High Point College

Many prospective teachers and many home economists are happily accepting the fact that creative art involves the entire thinking process.

They seriously grapple with the principles of emphasis, balance, rhythm, contrast, and transition in expressing their original ideas and have come to the conclusion that the field of art is not in a category all alone but is a part and parcel of the home life, the social life and the aesthetic life of individuals. Painting is the natural expression of a person's desire to create. This creative desire is the urge that motivates the student of art at High Point college; therefore emphasis is placed upon creative art at the college.

The student's concern with line, space, dark and light, color, texture and volume does not end

when the materials are put away for the day, but their very universality are constant stimuli.

Yes, you have guessed it! Never a dull moment in the art classes! When the student observes man and his environment the subject matter of art offers so much thought that one is compelled to give vent to his ideas in some creative form, whether it be in music, dancing, writing, domestic arts, decorative arts, graphic arts, or what have you.

In the art classes at High Point College the students experiment individually with water color, charcoal, pastels, oils, pen and ink, clay, plastics, plaster of Paris, papier mache, stencil, block printing and construction. When the favorite media of expression is found, the student is then encouraged to concentrate on this means of expression until his skill

Court Upholds Law Against Criticism Public Officials

BUENOS AIRES, Feb. —(U)—Argentina's government has won its first conviction under the new law penalizing criticism of public officials.

Reversing a lower court acquittal, a three-judge federal court convicted Jose Maria Cullen, Jr., Buenos Aires lawyer, of insulting President Peron. Cullen's crime is known officially as "desacato."

Cullen was charged with using "expressions of a personal nature offensive to the dignity and decorum of the President of the nation" in a written brief he prepared for a law case.

is adequate to forcefully express his creative ideas.

The contributions, methods and drives of art through the various stages of world history are interwoven into the creative arts program. This study not only develops appreciation, but also builds up man's confidence in his ability to meet the demands of his age. Every age has tried to meet the needs of its peoples for Things, Expression of Ideas, and Celebration of Emotions.

In this the atomic age, the art field, like every other field, is searching for new forms, new skills and new materials to meet the needs of present day man.

Commission To Study Allocation

CHAPEL HILL, Feb. —(U)—What percentage of state road funds should be allocated to cities?

That question and others will be tackled by the North Carolina municipal roads commission.

The commission recently organized a study group and named Mayor Victor Shaw of Charlotte as chairman. The study group held its first meeting here yesterday and named a steering committee to assist Shaw in preparing the agenda for future meetings.

Appointed to work with Shaw were David Kelly of the North Carolina farm bureau; Mayor J. Ray Shute of Monroe, President of the North Carolina League of Municipalities; Mrs. Harry Caldwell, secretary of the North Carolina Highway Users Conference, and Mrs. Davetta L. Steed, executive secretary of the League of Municipalities.

Northern Idaho mines are among the major sources in the United States of lead, zinc and silver.

Art Class Students Go Through Experiments

High Point College art students are going through a series of experiments in their art classes. The students are working on a variety of projects, including painting, sculpture, and printmaking. They are also learning about the history of art and the techniques of different artists. The students are encouraged to think creatively and to express their own ideas through their art.

Art classes are offered at High Point College for students interested in the visual arts. The classes are taught by experienced faculty members who provide a strong foundation in art theory and practice.

Students enjoy the outdoors at High Point College.

Commission To Study Mergers

The High Point College Board of Trustees has appointed a commission to study the possibility of merging the college with other educational institutions in the area. The commission will report back to the board in the near future.

The commission's task is to evaluate the strengths and weaknesses of the college and to identify potential opportunities for growth and development.

High Point College Survives After Hard Fight

Progress Of 25 Years Phenomenal

By EMMA FRANCES BABER
Assistant Professor of English,
High Point College

Although High Point College can boast no "storied urns" nor "ivy towers" nor "animated busts" to reveal its historical past, however, it can boast the struggle of youth, for the 25-year-old institution, just emerging from its "growing pains" into the full bud of fruition, is assuming its place among the colleges of the nation.

The conception began with the Methodist Protestant Church as a brain child of the late Rev. J. P. McCulloch, D. D., a native of Guilford county, North Carolina and a graduate of Adrian College, Michigan, who became imbued with the idea of a college, related to the Methodist Protestant Church in North Carolina, and promoted the idea throughout the conference district. After many years of effort, in 1920, at an annual conference of the Methodist Protestant Church, High Point College had its birth. This action was largely inspired by a conditional legacy in the will of a layman, J. C. Roberts of Kernersville, to the amount of \$10,000. This gift never materialized because of the time limitation, and the fund was invested to educate young men for the ministry. However, in honor of the generous interest the administration building, when erected, was named Roberts Hall.

Drive For Funds

Following the conference of 1920, a drive for funds was actively and successfully made in the churches. This campaign was directed by a committee appointed by the conference, consisting of Rev. R. M. Andrews, Rev. J. E. Fritchard and Rev. L. W. Geringer.

A building committee composed of F. R. Harris, R. F. Williams, J. Norman Willis, R. H. Brooks, J. S. Pickett, Rev. J. F. McCulloch and Rev. R. M. Andrews, was named and empowered to locate the college and to decide on the type of architecture. The committee decided that the college be built at High Point and of colonial design. The cornerstone of the administration building (Roberts Hall) was laid June 23, 1922. Following closely the erection of this building, the dormitory for the girls (Woman's Hall), the dormitory for boys (McCulloch Hall), and the heating plant were completed. And on September 15, 1924, the college opened for work with one hundred and thirty-two students, of whom fifteen were sophomores coming by transfer from other institutions.

The city of High Point donated fifty acres of ground and contributed \$100,000 through a citizens committee, and thus evidenced its desire for the educational and cultural advantages that a college can contribute to a community.

Rev. R. M. Andrews, D. D., was chosen as the first president. He had served as field agent in the campaign for funds and was a for-

DR. R. M. ANDREWS
First President

DR. DENNIS H. COOKE
Incumbent

DR. G. I. HUMPHREYS
Second President

mer president of the Annual Conference. To him, therefore, was committed the task of organizing the college and collecting the building pledges. Dr. Andrews resigned in February, 1930, to take effect the following June.

Select Humphreys

Rev. Gideon L. Humphreys, A. M., D. D., LL.D., was selected by the board of trustees to fill the vacancy and began his work as president immediately following the close of the college year in June, 1930. Dr. Humphreys, a former president of the Maryland Annual Conference, was in close touch with the educational program on the General Board of Christian Education. From 1924 to 1930 he served as president of the board, resigning there from on his election to the presidency of the college.

During his administration, the college had a phenomenal growth. Its growth from a struggling "duckling" in the collegiate world to a place of prominence among the smaller colleges cannot accurately be measured in terms of property assets or endowment. Almost 1,600 young men and women have received diplomas from the church-affiliated school and more than 100 of these now fill Methodist pulpits in the South. This alone testifies to the value of the school to the community and the South. Still, High Point College's rise from a muddy campus and three heavily-mortgaged buildings to its present \$1,000,000 plant is a success story in itself.

Dozen Buildings

Those who attend the inauguration of Dr. Dennis H. Cooke will view a campus that contains no fewer than a dozen picturesque colonial style buildings. Added to the three original buildings which comprised the college when the doors opened in 1924 have been the Harrison Gymnasium (1922-36); the M. J. Wren Memorial Library (1936-37); Albion Mills Stadium (1936-

38); Student Center Building (1941-42); and the American Business Club Field House (1947). In addition to these major property assets the college has acquired the president's home (1931), a Home Economics House (1939), two professor's homes (1937), and 13 lots adjacent to the campus. Additional rooms have been added to the third floor of Woman's Hall, facilities have been increased in McCulloch Hall, the boy's dormitory, and a baseball field has been constructed. The fifty acres of campus are being developed into a park, paralleling the highways through and around High Point. The campus has been greatly beautified, concrete walks laid, the main road into the campus hard surfaced, and much new equipment has been added. High Point College has grown to such an extent that even the handful of Christian people who dreamed of a college and nursed their dream to realization would be amazed to see the result of their vision, faith, and perseverance.

During the administration of Dr. Humphreys the school progressed both physically and academically.

Harrison Gymnasium, Woman's Hall improvements, M. J. Wren Memorial Library, Albion Mills Stadium, the Student's Center, and the American Business Club Field House were added to the campus during his administration.

Enrollment Jumps

The enrollment jumped from 303 in 1930 to 846 (an all time high) in 1948. The total value of the property and endowment is now nearly one and a half million dollars, and nearly \$300,000 debt has been retired in the past fifteen years.

Dr. Humphreys retired June 1, 1949. During his 19 years of administration, from 1930-49, he, assisted by an able board of trustees, indelibly left the stamp of progress upon the "struggling duckling of 1930" and the High Point College of 1950 is a monument to that administration.

High Point College is under the sponsorship of the Methodist church. A local board of trustees holds title to the properties and directs the operations of the institution.

At present the college stands up-

on the threshold of a new era ready to put its shoulder to the wheel of progress under the administration of Dr. Dennis Hargrove Cooke, to be inaugurated president of High Point College February 23.

Building Story

PORTLAND, Ore., Feb. 19, 1949. — If the walls of a big, ornate downtown structure could talk, they certainly would have some human interest stories to tell. The building was first the Elks Temple, then the WPA headquarters in the depression, armed forces induction center in the last war, and now opens its roocco doors as the biggest social club in town. The five-story building has everything from swimming pool to ballroom for 1,200 dancing couples.

Corn Crop

SPRINGFIELD, Ill., Feb. 19, 1950. — (INS)— Illinois produced its second largest corn crop on record during 1949. State and federal agriculture departments said farm stocks of corn totaled 389,000,000 bushels on Jan. 1.

High Point College, a small liberal arts institution in North Carolina, has survived a hard fight to preserve its progress over the past 25 years. The college, which has a long history of academic excellence, has faced numerous challenges in recent years, including financial difficulties and a decline in enrollment. Despite these setbacks, the college's faculty and administration have worked tirelessly to maintain the institution's standards and values. The college's commitment to providing a high-quality education has been a source of pride for its students and the community. The college's success in surviving these challenges is a testament to its resilience and dedication to its mission.

HIGH POINT COLLEGE

Library Facilities Today Include 17,500 Volumes

By MISS MARCELLA CARTER
Librarian

It was indeed a modest start in library reference facilities when High Point College could offer its students a collection of only 2,025 volumes in 1925. And these represented the generosity of donors not only in High Point but from many areas in the state where friends of the new college had been so solicited to contribute from their own libraries.

Obviously such a small "library," called for very small shelf quarters. So it was that on the second floor of Roberts Hall Dr. C. L. Whitaker, the first librarian who served from 1924 to 1936 in that capacity, provided library service from a single room. Because library duties did not involve full time, Dr. Whitaker also taught Bible as a member of the faculty. In one section of the original room there now appears a tablet expressing esteem for Dr. Whitaker, presented to the college as the gift of the first graduating class—13 members.

Material progress had been reached both in size and scope of the library when the special Wrenn Memorial building was erected in 1937 as the gift of Mrs. M. J. Wrenn, in memory of her husband, a pioneer manufacturer, civic leader and member of the College Board of Trustees for several years. By this time there were 11,500 volumes on the library shelves.

Architecturally the building is keeping with other structures on the campus. Long windows on all four sides give plenty of light and ventilation for the main floor of the library which consists of one large reading room, an office for the librarian, cataloging room and quarters for members of the library staff. The day-light is controlled by venetian blinds which prevent glare but let in ample light and air. The floor of sage green

and walls of pale sea-green are restful to the eyes. Indirect light, furnished by the electric fixtures of chromium and white glass, make study by night as comfortable as by day.

The chief architectural feature of the room is the memorial fireplace with decorative moulding, making a double frame surmounted by a vaulted arch. Inside this frame is a lovely oil-portrait of the late Mr. Wrenn. On each side of the fireplace are smaller tables and a collection of "beautiful books."

"The 'beautiful book' collection is a project financed with money collected from fines for overdue books. This is a nucleus collection of attractive editions of the classics and other beautifully illustrated books. This serves as a browsing nook for students.

Furniture in the library was made possible by the bequest of Mr. A. S. Pickett of Lexington. The sturdy oak tables, rectangular and in two sizes are especially designed for library use. Windsor-type armchairs are comfortable as well as conducive to study. Steel stacks, olive green in color house the present 17,500 volumes which are also located on the main floor and are open to the students. Five additional sections of shelving were added recently to take care of the rapidly increasing collection.

Another feature of the library is a large glass display case in which creative work of students, faculty and townspeople has been exhibited. These displays never fail to create a great deal of interest, and some of the creative work has been leathercraft, old glassware, an exhibit of beautiful oil paintings by Dutch masters.

The library has its social life as well as its intellectual life, and

TWO LIBRARY SCENES: Pictured is the Wrenn Memorial Library at High Point college, also a view of interior, with students doing research.

since the arrangement of the building lends itself so well to social functions, many tents are given here for church groups, faculty and administration, and students groups.

If you are one who thinks life is always dull among all these times you might look over some of the following interesting and stimulating reference questions which are daily asked of librarians and which keep them busy going from the World Almanac to Mother Goose Rhymes:

How to dissect a pig; address of company that makes ballet shoes; origin of North Carolina state motto; Tin pan alley; number of magazines published in the United States in the past year; dimensions for a basketball court; a "mushy" story; military campaigns of Julius Caesar; care of poinsettias; inscription on the main post office in New York City; legend of the dogwood; canning and preservation of fish; suggestions for making favors for hospital trays; places of interest to see in New York City; address of company where milk can be obtained; color scheme for a bathroom; wonders of the modern world; famous love letters; address

of a "ghost writer"; address of an Alaskan newspaper; flower arrangements; fox hunting; highways in Canada; fortune-telling; how to lessons for foreigners.

Felicitations to DR. DENNIS H. COOKE

Third President of
HIGH POINT COLLEGE

We wish you a long and successful administration.

Business Administration Serves Local Concerns

By DR. GEORGE H. HOBART
Head of the Business Administration
Dept. of High Point College

In the Business Administration classes of High Point College scores of young men and women are preparing themselves for successful roles in the business life which centers in this thriving section of the state. Here they are meeting the growing requirements of business for more college training. Here they are steadily building a backlog of candidates equipped to fill the constant demand of industry for personnel to swell its ranks.

Two important objectives characterize the training which this growing department offers. The first is to supplement the needed cultural background which the other college departments supply. It is not enough to offer specialized business training. The student needs a broader knowledge based on English, history, religion, sociology, philosophy, the natural sciences, and the languages in order to equip himself for a well-rounded life in the business community. The second objective of the department is to supply a more practical training for entrance into secretarial work, jobs in industry, executive positions, and business ownership.

To fulfill these objectives, the curriculum comprises a wide range of background, or introductory courses, followed by more specialized courses which lead to a variety of business fields. The foundation is laid by such courses as Introduction To Business, Business Machine Operation, Business Mathematics, Business English, Typing, Shorthand, Accounting, Economics, Labor Relations, and Business Law. Such courses fa-

miliarize the student with skills and techniques and with the principles which underlie the operation of business. The more specialized courses include Advanced Accounting, Retailing, Insurance, Advertising, Sales Management, Industrial and Personnel Management, Business Finance, and Government Finance. These courses open up the techniques of different types of employment and aid the student in selecting the field of work in which he is most likely to succeed.

A healthy development of the Business Administration Department is apparent since the end of World War II. Veterans, aided by the G. I. Bill, have found High Point College a sympathetic place in which to gain a thorough training for a business career. As more and more of these veterans have been graduated, their ranks are being filled with recent graduates from high schools.

Business men, too, are finding here a full response to their need for college-trained young people. Their demand for more preparation in accounting has resulted in the offering of advanced courses so that the student now has available courses in income tax accounting, cost accounting, auditing, and governmental accounting during a 4 year course. Business offices have asked for more training in the operation of office machines.

Consequently, types of calculating, duplicating, bookkeeping, and transcribing machines most frequently found in offices of this area have been provided for special machine drill. Cooperation with personnel managers is maintained through the college placement bureau, which maintains complete record of the

THEY LEARN ABOUT BUSINESS AT HIGH POINT COLLEGE. Pictured is a scene taken during a business administration class at High

Point college. Dr. George H. Hobart is head of the business administration department.

qualifications of both students and alumni, and assists employers in selection. Suggestions from employers are welcomed, and at times helpful information on technical subjects is supplied to them by the instructional staff. On invitation, groups of students are taken on field trips to observe conditions in factory and office operation.

The Business Administration department is headed by Dr. George H. Hobart, who has had a long practical experience in business as sales and advertising executive and received his Ph. D. degree from the University of North Carolina at Chapel Hill. Shorthand, typing, and secretarial training is under the supervision of Mrs. Alda T. Berry, with a graduate degree from Columbia University. Advanced accounting courses and Business Law are taught by Mr. Richard S. Dale, whose graduate degree is from Cornell University. Industrial and Personnel Management, Marketing, and Retailing are the special fields of Mr. David W. Braithwaite, whose graduate work was pursued at Ohio State University. Accounting and Business Mathematics are taught by Mr. Gordon E. Bell, who has recently joined the faculty and who received a graduate degree from the University of Florida. Flexibility has been added to the teaching staff by the occasional use of experienced part-time instructors and lecturers from professional and business ranks.

Each year the number of High Point College graduates with majors in Business Administration is increasing. Most of them have sought and found satisfactory

starting positions in banking, speeded up by the business back-service, sales, or manufacturing ground knowledge acquired in their businesses where their progress is High Point College courses.

Congratulations and Best Wishes To High Point College

Divorce Case

CAMDEN, N. J., Feb. —(INB)—A New Jersey milkman is suing for divorce because he objects to sharing his bed with a cat and a dog. Frank C. Reif, of Haddon Heights, reportedly said his wife once told him, "I will never put them (the pets) out. They are going to sleep here. I think more of them than I do of you." Reif seeks a divorce on the grounds of desertion. His wife, Theima, has filed a countersuit on similar grounds.

The Leaning Tower of Pisa has tilted a little over a quarter of an inch in 12 years.

Business Administration Solves Local Concerns

As the year 1977 draws to a close, the Business Administration students of High School are busy with their final projects. One of the most interesting projects is the "Local Concerns" project, in which students are required to identify a local problem and propose a solution. The project is designed to help students develop problem-solving skills and to become more involved in their community.

Recreational Activities Feature Life In College

By ANTIA WITHERS
Student of High Point College

The new student at High Point College will find that, besides having to study and attend classes, he will have many opportunities for important activities of a recreational nature.

There are enough activities offered by High Point College for every student to take an active part; the chief problem seems to be finding time to take in all that is desired. While dormitory students have the advantage, as they are on the campus for a greater length of time each day, many of the activities are planned so that all students can participate.

The cry, "Let's go to the bookstore," is one heard often around the campus.

The building which houses both the bookstore and the student center is a most popular one; the bookstore, especially, is the hub of campus life since it is open in the morning during the week as well as, at other times. If one has an hour between classes, he is likely to head for the bookstore for a

soft drink or to meet his friends.

Lucky is one if he finds space for dancing or finds a seat in a booth.

The upper floor of the Student Center houses the student activities center, which is open in the afternoon and early evening. Ping-pong tables take up one side of the large room, while tables for card games and checkers are set up on the other side. The jukebox furnishes music for dancing and comfortable chairs line the walls. From time to time, informal dances and parties are held here for all students. Tennis, shuffleboard, and horse shoe pitching courts are located within a small area close by. All of these the students enjoy, whether in an active role or as a spectator. Another favorite pastime is to watch the regular varsity teams take the field or court — there is always some sport in progress.

Dormitory life is a great inducement for many to come to college and students are rarely disappointed. The friendships which result from living together for four years are of great value both during and after college life. Dormitory stu-

HOME COMING PARADE FLOAT: Pictured is a Home Coming parade float, with students dressed like Catwaba Indians, pulling the "Panther Express."

Students have the advantage of informal gatherings many times during the day and night and have occasional dormitory parties, which makes campus life even more enjoyable. The day students have their own organization, and also sponsor parties during the year. The girls have a club room in the main building which is the location of some study and much fun.

While all of the students enjoy "The Zenith," the annual; and "The Hi-Po," the student paper; these publications serve to give interested students a special outlet for energy and ability. These staffs work hard but find it worth the effort. Members of the band and choir, student government, and the class officers spend their leisure time profitably, as well as, mix fun with the work. There are professional clubs which are valuable to those who plan to follow the different vocations represented: The Religious Education Club, The Ministerial Association, The H. M. M. Club, The History Club, The Woman's Athletic Association, and the Spanish Club are in this class.

Dances and beauty contests are special events which interest most students. The freshman and sophomore classes each sponsor a dance; the junior and senior classes combine their dance. On special occasions such as Homecoming, Christmas, and May Day, other dances are held. A Homecoming Queen and a May Queen are chosen to reign at their respective dances. Each class annually elects its representative for the big beauty contest, that for Miss High Point College.

Mother Wins New Trial In Death Of Infant Daughter

ATLANTA, Feb. — A 23-year-old mother has won a new trial after serving six months of a life term for the murder by starvation of her infant daughter.

The Georgia supreme court has set aside the sentence imposed last August in rural Jackson county against Mrs. Myrtle Gee Jackson. The pretty brown-haired divorced mother was charged by the state of going out with men night "in various stages of undress," leaving her young daughter helpless and dying from neglect.

A physician testified that the child, two-year-old Martha Ann, died of starvation and malnutrition.

The supreme court rules that evidence given the jury that the young mother operated a disorderly house was prejudicial without showing a "motive, plan or scheme to commit the crime."

Hospitality

LONDON, Feb. — (IN8) — The manager of a stand at the school boys exhibition in London left his office for a few minutes to save an exhibit from inquisitive boys. When he returned he found that a 12-year-old Scot was using the telephone for a long distance call to his home in Scotland. He was saying, "... and the facilities for visitors here are extraordinarily good."

Livestock and poultry need water badly in winter as in summer.

Nine social clubs are active on the campus, six for men and three for women. These sororities and fraternities have regular meetings, usually every other week, and sponsor parties during the year. The big events are "Rush Week" with its days of parties and initiations, and the annual Spring Banquets which serve as a homecoming for the college alumni.

All these events and many more make up life on the High Point College campus. Even such trivial things as a walk through the campus, a long talk with a friend, or a trip to town to the moving pictures have their places. Every student here can find something for which he is especially suited and which needs his participation.

SHE GETS HER DIPLOMA: Pictured is a scene taken at the mid-winter graduation exercises at High Point college. Dr. Dennis Cooke, president, is presenting Gloria Foust Martin her diploma.

Extracurricular Activities Feature Life in College

With the 1984-85 academic year in full swing, students are enjoying a variety of extracurricular activities. The college's sports teams, including the football, basketball, and volleyball teams, are competing in various leagues. The college's marching band and pep band are also performing at various events. The college's student government is also active in various community service projects. The college's various clubs and organizations are also providing students with a wide range of opportunities to get involved in college life. The college's various activities are providing students with a well-rounded college experience.

College Has Strong Faculty

By DR. LINCOLN LORENZ

Head of the English Department
A spirit of breadth, reflecting many influences which range from the local community to the State, distant parts of the nation, and foreign countries characterizes the faculty of High Point College and promises well for the growth and importance of the institution. While the student body is predominantly from High Point and its environs, the many places of birth and residence and the diverse college and university training, undergraduate and graduate, of the members of the faculty reveal a stimulating cosmopolitanism without loss of a definite character.

Faculty members have lived, studied, and taught in parts of the nation as geographically distinct as Michigan and Texas, Massachusetts and California; and several have been students and teachers beyond the boundaries of the United States. At the same time, as is natural and fitting, a large majority are, in both residence and training, of the South, primarily from North Carolina, and secondarily from such nearby states as South Carolina, Virginia, and Tennessee. All the major officers of administration are North Carolinians.

Of the administration members, Dr. Dennis H. Cooke, the president, is a native of North Carolina, received his A. B. and A. M. degrees at Duke University and taught many years in his home state; his Ph. D. degree, however, is from George Peabody College in Tennessee. Dr. Clifford Reginald Hineshaw, Dean of Instruction since 1939 and Head of the Department and Professor of Education and Psychology, is a graduate of Guilford, and did some of his advanced study at the University of North Carolina and at Duke; his other graduate work was at Columbia, and his LL. D. degree is from Western Maryland. He, too, is a North Carolinian and has been at High Point College since 1927. Dr. Percy E. Lindley, Dean of Students and Professor of Religious Education, graduated from Elton; he has taught at High Point College since its founding. In 1924, his advanced studies were at Vanderbilt and Chicago, and his LL. D. is from Western Maryland. Mr. Ralph E. James, a North Carolinian, is Director of Athletics and Head Coach. Connected with the College from its beginning is Mrs. Clara L. Whitaker, now matron of Woman's Hall and formerly dietitian.

Five members of the present faculty, including Dr. Lindley, have been on the instructional staff of the College since 1924; one of them, Miss E. V. Idol, is a native of High Point, two others are also from North Carolina. Mr. J. Hobart Alford and Dr. Lindley, and the final two, Mr. J. Harley Mourane and Mrs.

FACULTY: Here's a view of High Point college faculty, with President Cooke in the middle of the front row.

Alice Paige White, come from other states. Professor Alford, Head of the Department of Modern Languages, and Professor Mourane, of the Department of Chemistry and Physics, pursued their undergraduate and graduate studies chiefly at the University of North Carolina; Professor Alford did some of his graduate work at the University of Mexico.

Miss Idol, Professor of English, who has taught in four states including North Carolina, received her A. B. degree from Greensboro College, and her A. M. degree from Columbia University; she did additional study at the University of North Carolina and at Oxford University. Mrs. White, Assistant Professor of Religious Education, formerly of the Department of English, has lived in High Point forty years.

Graduates of the College who are members of the faculty include Herman E. Coble, Associate Professor of Education and Manager of the Bookstore, a member of the first class of 1927; Miss Louise Adams, Assistant Professor of Mathematics; Mr. Henry L. Ridenour, Counselor for Men; and Mr. Richard A. Short, Bursar and Graduate Manager of Athletics.

The members of the faculty who have lived or studied in the adjacent states of South Carolina, Virginia, and Tennessee are a large, important group. Mr. Nathaniel P. Yarborough, Professor of Modern Languages and Registrar, did his undergraduate work

and study at the University of South Carolina and at the Sorbonne; he has been teaching at High Point College since 1925. Other members from South Carolina are Miss Marcella Carter, Librarian; Mrs. Alda T. Berry, Assistant Professor of Business Administration; Mrs. M. L. B. Barker, Instructor in Art; and Miss Margaret Carter, Secretary to the President.

Of the Virginians, Mr. Stuart C. Deskins, Head of the Department of History, taught in Elton College and in other institutions in this state, and he received his Ph. D. degree from the University of North Carolina. Mr. Arthur S. Withers, Professor of English, is a Virginian whose A. B. degree is from Emory and Henry (where he later was head of the English Department) and A. M. from Vanderbilt, and whose further graduate studies were at the University of North Carolina, Johns Hopkins, and Columbia. Miss Emma Frances Baber, Director of Publicity and Assistant Professor of English, also a Virginian, received her B. S. degree from the University of Virginia and her M. A. degree from George Peabody College.

The only native of Tennessee on the faculty, Dr. Davis Miller, Driver, Professor of Modern Languages, has his A. B. degree from the University of the South and his A. M. and Ph. D. degrees from Columbia; he taught for ten years in Brazil as well as in colleges of Tennessee and Arkansas. It is worthy of note that such institutions in Tennessee as Vanderbilt University and George Peabody College have had as graduate students Dr. Cooke, Miss Arnette, Miss Baber, Miss Carter, Miss Idol, Dr. Lindley and Mr. Withers.

Representative of the Far South, the Middle West, and the Southwest are Dr. Benjamin H. Hill, of Texas, Professor and Head of the Department of Biology, whose A. B. and M. S. degrees are from Texas Christian University and whose Ph. D. degree is from the University of Illinois; Dr. George H. Hobart, of Michigan and Ohio, Professor and Head of the Department of Business Administration, whose A. B. degree is from Michigan University, and whose A. M. and Ph. D. degrees are from the University of North Carolina; Dr. Amy Clowes, of Wisconsin, Associate Professor of Education, whose Ed. D. degree is from Teachers College of Columbia University; Miss Ada B. Johnson, Assistant Professor and Instructor of the Department of Home Economics, whose B. S. degree is from the University of Nebraska and whose M. S. and M. A. degrees are from New York and Columbia Universities respectively; Miss Ernestine Fields, Assistant Professor of Music, whose M. Mus. degree is from Michigan University; Miss Dorothy Nell Arnette, of Kansas, Director of Physical Education for Women, whose B. S. is from Southwestern College and H. M. from George Peabody; and Arthur Gar-

Basketball Team Holds Limelight; On Rampage

By BILL HACKNEY
Enterprise Sports Writer

The big news in High Point college athletics at this point in the school year 1949-50 has come primarily from two things, the sensational basketball team that came within one game of tying a modern state record, and the resignation of athletic director and head coach Ralph James along with the subsequent hiring of C. Q. (Tex) Smith from Georgetown College of Kentucky, although Smith will not arrive at the local institution for another two weeks to assume his duties.

On the other hand, the recent grid season is better forgotten in the opinion of most Purple Panther grid fans. The Methodists won but one game of a 10-game slate, and tied two others, finishing eighth in the nine-team conference.

COACHES WINNER: Ralph James, pictured, leaves High Point college in March to return to Asheville, but he leaves behind him one of the most phenomenal basketball records in the history of the school. He coached his Panthers to an easy triumph over rival North State conference teams in the regular season.

But the surprise had just begun. Against little-known Hanes Knotters of Winston, a sensational 18-game winning streak was started.

The kayos came in rapid-fire order with the Panthers averaging well over 70 points during the record run. They walloped the Monroe Clippers, McCrary (who was undefeated in 12 games at the time), Hanes Hosiery in a return meet, Erskine, Catawba and Appalachian twice each in the conference. They were the big wins. But there were others.

Streak Halting

East Carolina brought the win string to a halt nine days ago when the Panthers were one game away from tying the modern state record for consecutive wins. But even without their top scorer, Ed Suela, the Panthers bounced back last week to take a revenge win over East Carolina and sew up the regular season crown in the conference. High Point will be seeded first in the annual conference tourney at Statesville, which begins Thursday. If the Panthers take that, they will be only the second team to do so after winning regular season honors. But nothing yet has been impossible for the 1950 Panthers, greatest team's team ever to play for High Point college.

Coch James makes his exit at High Point on March 1st. Wherever he goes and whatever work he turns to, the great record of his basketballers, especially his staff, will be all the recommendation he needs.

Coch Smith comes to High Point in the next few weeks with

one of the better records of any small college coach in the nation. With plenty of help, he can put High Point college teams on the map. But the help must be allowed him by college officials and the support by students and alumni. And miracles, even improvements, will take time.

With all that, athletic prospects at High Point should reach a new high within the next few years.

Eggs are such a nutritious and plentiful food these days that they should be used often. Serve them in an omelet with a tomato sauce for lunch, or in a cheese soufflé for supper.

We Congratulate HIGH POINT COLLEGE

and its new President

Dr. Dennis H. Cooke

Had High Hopes

Things were different last fall when football came along. Fans and alumni held high hopes for the 1949 Panthers, and insisted that they would better the 1948 record of five wins, three defeats, and two ties. Approximately two dozen lettermen were on the scene as the season started.

But Coach James' team got off on the wrong foot, losing to Western Carolina by two touchdowns, and the Catamounts went on to take the crown. Newberry won a home decision at Newberry, S. C., and the Panthers finally got into the win column, 107-0, against a pitifully weak Pope Field Air Base service team. Then the turning point came along. At their peak, both mentally and physically, the Panthers staged a terrific struggle before bowing by 6-0 to Catawba on an 86-yard punt return. The team never fully recovered from that heart-breaker. Lenoir Rhyne and Appalachian followed, Catawba with wins. Then the Panthers had another good night, rolling to a 19-6 lead over favored Guilford in the third quarter. It wasn't enough however, and the Quakers came back to tie on long passes in the final 15 minutes. A tie with E.C.T.C. and losses to Elon and Woford finished the year.

In truth, the Panthers owed their record number of setbacks to the terrific improvement of the conference as much as to any deficiency in coaching or players. While most of the other eight clubs were bolstering their rosters, High Point fell behind, depended more and more on older men who had been top-flight in the first years after the war, but couldn't hold their own in the faster circuit.

No Unbroken Team

Concerning next year's football prospects look bright for an even better schedule of conference and interconference foes. One thing is certain, the Panthers can't be expected to climb the undefeated ladder in 1950.

Coch James started the basketball season with a group of players, few of whom were considered stars in their own right. His first five was made up of a third string frosh center in 1949, a former hustling jayvee, a four-to midline guard, a flashy punk shot artist who hadn't lasted in '48 because of his grades, and the only real forward not noted for consistency. The remainder of the squad had had no varsity experience whatsoever.

But the first five blended into a miracle team, a cohesive band of well-conditioned athletes who played together as though they could read the other fellow's mind. In the second game of the season, it was a surprise when they lost by only three points to a well-known professional team from Hanes Hosiery.

FIELD HOUSE: Pictured is architect's drawing of the field house at High Point College. Gift of the American Business club of High Point, the field house fills a need long-felt at the college. It has

quarters for visiting athletic teams, as well as teams of High Point college.

Distinguished Writer Heads English Division

As a scholar, an author, a poet, a teacher, and a leisure-time artist Dr. Lincoln Lorenz, the head of the English department of High Point College, has brought distinction and prestige to High Point college in the field of English. He has a rich cultural heritage as one of a family of Harvard men. The son of a manufacturer, he spent his early life in a suburban home in Philadelphia and later moved with the family to New York City. As a scholar, he completed the work of high school in three years, was the class day orator, and achieved distinction in debating. From Harvard he received the A. B. degree Magna Cum Laude in English, writing his thesis for honors on the subject Comedy in Shakespeare. From the same institution he received the A. M. degree, and later from Stanford University received the Ph. D. in English. During his scholastic career he made an intensive, as well as a comprehensive study of English literature and of foreign languages in addition to English. He speaks French, German and Latin. For his dissertation for the Ph. D. degree he chose the subject The Technique and Spirit of the English Historical Novel from its Origins to Scott.

As an author, besides his A. B. thesis and his Ph. D. dissertation, he has published many books, poems, magazine and newspaper articles, and at present has in manuscript form a volume of poetry and a book ready for publication.

For his first book "The Life of Sidney Lanier" he traveled widely in the South, concentrating a part of his time in Georgia and the mountains of North Carolina where Sidney Lanier lived a period of time before his death, and assembling his material.

DR. LINCOLN LORENZ

He spent four months in England and on the continent of Europe, visiting France, Switzerland, Italy, and the island of Corsica before completing his John Paul Jones; Fighter for Freedom and Glory, a scholarly edition, which is now in its second printing. Of the 5000 copies printed the United States Navy purchased 1000, placing them in the libraries of its ships during World War II.

Two Manuscripts

He has also two book manuscripts which he hopes soon to have published. One of them, John Paul Jones in Russia, is timely in revealing how the past is applicable to the present in the story of the treachery of the Russians which beset Jones professionally and personally during his service in Russia. The other is a large collection of poems; approximately twenty-five of them have appeared in newspapers and magazines.

Besides the books he has had articles to appear in The United States Naval Institute Proceedings, The Encyclopedia Americana (1950 edition), and The Dictionary of American Biography. He edited a monthly pamphlet of reviews entitled Current Books; did research work in the Library of Congress in the Legislative Branch; and for a brief period did statistical research in the bond business in Boston and in New York City. As a teacher, before coming to High Point College, Dr. Lorenz was a member of the faculty at the University of Wisconsin, The University of Texas, The University of California at Los Angeles, and Western Maryland College. He holds membership in the United States Naval Institute, The Modern Language Association, The North Carolina Education Association, and the Poetry Society of America.

Like Sports

Dr. Lincoln Lorenz, conservative in speech and manner, likes football, baseball, portrait and landscape painting; but his chief interests lie in writing and in the study of nature. As head of the English Department of High Point College he hopes to see that department "contribute progressively to the cultural advancement of High Point College."

When away from High Point, Dr. Lorenz makes his home with his brothers, Keith Lorenz, a lawyer and the chairman of the new York State Labor Relations Board of

Moscow Americans Have Own Club

MOSCOW —(U-P) The Anglo-American colony in the Soviet Union has become a very self-contained unit. It has its own children's school, doctors and dentists, movies, dances, dancing classes, priest and preacher, badminton and tennis courts and now, its own club and bar.

The club was started by the enlisted personnel at the United States Embassy, together with State Department clerks. It offers movies four or five times a week, a bingo party at least once a week,

dancing to phonograph (and sometimes a live band) and a bar seven nights a week.

HELPS CHASE RATS

WALLINGTON, England —(U-P) Once upon a time this Surrey village had a ratcatcher and he was content to get around on foot. The village council has now accepted this recommendation from its public health committee:

"The Committee feel that the rodent operative could carry out a greater volume of work with the use of a bicycle."

Cotton Spinning Industry Shows Gain Over 1949

WASHINGTON, Feb. 19 —(U-P) The Census Bureau reported the cotton spinning industry operated during January at 133.0 per cent of capacity on a two-shift, 80-hour week basis.

This compared with 124.7 per cent during December last year, and 112.0 per cent during January last year.

Spinning spindles in place Jan. 28 totaled 23,286,000, of which 20,217,000 were active consuming cotton on the last working day of the month, compared with 23,341,000 and 20,241,000 for December last year, and 23,754,000 and 20,927,000 a year ago.

Active spindle hours for spindles consuming cotton for January totaled 9,091,000,000 compared with 9,266,000,000 for December last year and 8,245,000,000 for January last year.

GO TO SCHOOL

PEARL HARBOR —(U-P) Education has arrived in the U. S. trust islands of the Pacific — and everyone wants to go to school. Grow-ups too. They want to learn to speak English so they can sell to American traders. They want to learn arithmetic so they can tell if they're making money.

The heads of school districts in the Marshalls, Truk, the Palauas, Saipan and Yap told about it at an educational conference sponsored here by the Navy. The U. S. took over the islands from Japan,

Malaya Plans Bauxite Mine

SINGAPORE —(U-P) —The Alumin Laboratories, Ltd., has applied to the Johore State Government for 2,500 acres of land for mining bauxite. If approved, it will be the first mine opened since the war.

Before the war Japanese companies mined bauxite in Malaya and exported the ore to Japan. Malaya exported 13,096 tons bauxite in 1937, 55,751 tons in 1938, 84,237 tons in 1939 and 55,380 tons in 1940. Up to the end of October 1941, when production ceased, Malaya had exported 50,825 tons during the year. During the Japanese occupation production was stepped up and between May 1942 and December 1944, 150,000 tons were exported to Japan.

MARION, Ill. Feb. 19 —(INS) —Mrs. J. H. Clarida of Marion said recently that herpet canary has become just a little too gifted. The bird has learned to imitate the ringing of the telephone. Mrs. Clarida is getting tired of answering the telephone to hear nothing but, "number, please?"

Three brothers are graduates of Harvard, two of them with LL.B. and the chairman of the new York City and Joseph Lorenz an attorney of New York City. All

Many Ministers Go Out From High Point College

By DR. P. E. LINDKEY
Professor of Religious Education,
High Point College

Since its very beginning, High Point College has maintained a regular department of religious education and ministerial training. More than a hundred ministers have gone out from the local institution to serve the churches in various parts of the country, and forty-four are now enrolled for the same purpose.

Ministerial training, therefore, occupies a large place in the program of study at High Point College. Courses are offered in Old and New Testament, psychology of religion, ethics, Christian thought, church history, and other related subjects. And while no effort is made to take the place of the theological seminary, the department of religious education does lay stress on a broad cultural and academic program designed to aid the student as he enters the pastorate.

The young men who are studying for the Christian ministry have organized themselves into a student ministerial association. This group is the oldest organized student movement on the campus. It meets each week for worship, inspiration, and fellowship. Leading churchmen of the city are invited from time to time to visit these meetings and bring messages of practical instruction to the men.

Women Also
But the religious training is by no means confined to the young men. Many young women, looking toward a full-time career in church work, also receive special instruction at High Point College. In recent years the demand for directors of religious education in local

churches has outrun the supply, and our institution is helping to meet this demand. Already we have supplied qualified workers for churches in various parts of the state. These girls, while in preparation at the local college, band themselves together into an organization, somewhat like the ministerial students. They are known on the campus as the Religious Education Girls; and again like the young theologians, they meet regularly each week for their own programs of inspiration and professional interests.

It may now be said that the department of religious education at High Point College operates to serve four objectives. First, the training of young men for the Christian ministry. Second, to prepare young women to assume the role of directors of religious education in local churches. Third, the department gives general courses of a broad cultural interest at least one year in this department before graduating. So the studies are designed to meet the needs of **and** all young men and women who are seeking a more adequate appreciation of our religious culture and heritage.

Then the fourth objective is to assist young people to become better lay leaders in their own churches, and communities. Irrespective of vocation and professional work, all men and women find need for a better understanding of their own religious background and a more efficient skill in carrying on church work. Our courses are designed to help these persons.

Many Denominations
Numbered among the ministerial students at High Point College

are men of the various denominations of the country. While naturally the Methodist lead in numbers, Baptists, Quakers, Holiness Lutherans, Moravians, Episcopalians, Church of God and other groups may be found in the membership of the ministerial association. The work of the department is conducted in such a liberal and tolerant manner as to offend no evangelically faith, for it is truth and not mere dogma that is emphasized.

Some missionaries also have been trained at the local institution. As a result the Gospel has been carried as far as China in one direction and to the Barbadoes in the other by our graduates.

During the recent World War High Point College ministerial men were serving as chaplains with the army and the navy in practically all parts of the world. In fact the first chaplain commissioned from the Western North Carolina Conference of the Methodist Church was Rev. Leo Pittard, a graduate of High Point College.

Most of the ministerial men, after finishing here, continue their educational work at the Divinity School of Duke University; this is the usual pattern. A number, however, go to Westminster Theological Seminary in Maryland. Some go to the Southern Baptist Seminary at Louisville, Kentucky. Still other graduates take their ad-

vanced training at Yale, Harvard, Chicago, Northwestern, or Emory.

Thus, each succeeding year finds

an ever increasing number of High Point men and women taking their places in the leadership of the Christian Church. And through these graduates the college is making a distinct and lasting contribution to the religious life of the state and nation.

The first class to graduate at High Point College, that of 1927, consisted of thirteen members. Two of these were ministers. As the following classes have finished their work, and with a larger and larger membership, the ratio of young preachers to the total group has remained as large as it was at the beginning.

It may be rightly assumed, therefore, that the constant flow of educated men and women from the college halls into the leadership of the church will continue, and that the spiritual influence of our local institution will spread into ever wider areas of service with the passing years.

HEART SYMPTOMS
SAN FRANCISCO.—(U)—Hypnosis can produce symptoms of heart disease in healthy people says Dr. Leslie L. Bennett of the University of California medical school. He reports experiments in which subjects showed no heart damage before or after the tests. He says the experiments showed some of the difficulty which faces doctors who try to diagnose heart disease.

Chemistry Department Enjoys Excellent Growth

By J. HARLEY MOURANE
Professor of Chemistry and Physics
By contrast with today's facilities
High Point College's chemistry de-
partment in 1924 was primitive in-
deed—consisting of one lecture
room and one laboratory.

There were no laboratory tables
in the chemistry laboratory, no
demonstration table in the lecture
room, no chemicals or apparatus
available for immediate use. Thus
the chemical department started
from scratch. The department has
grown and expanded with the pass-
ing years and now occupies two
completely equipped laboratories,
one of which can serve as an ad-
ditional classroom, a laboratory
used by research students, located
in the basement of McCulloch Hall,
a lecture room, and a well stocked
and arranged stockroom. Recently
the department has had a face lift-
ing in a coat of paint and the in-
stallation of fluorescent lights.

The college opened, offering work
towards a major in chemistry and
also pre-medical training. Of the
graduates prior to 1950, one is a
chemist with the Enka Corporation,
Asheville, and six became medical
doctors. Four of them located in or
near High Point.

In 1930, a five year course in
Chemical Engineering was added,
with the hope to operate on the co-
operative system. The time was
wrong so in 1939 the co-operative
plan was abandoned in favor of the
straight Chemical Engineering
course. In 1943, in an attempt to
unify and to consolidate the work
of the college, the course in Chem-
ical Engineering was dropped, offer-
ing in its place a major in Chem-
istry. In 1949 it was considered
best for the interest of the college
to offer only two degrees, and AB
and a BS, therefore the major in
chemistry was dropped.

From 1930 to 1943 about thirty-
four students were graduated with
either engineering degrees or with
majors in chemistry. This group
is scattered well over the United
States, and represent placements
in such organizations as Proctor
and Gamble, Du Pont, Hercules,
Solvay, and the Atomic energy
projects of Oak Ridge, Chicago,
and Washington state. During this
same period, twelve pre-medical
and pre-dental students were
trained, three of them have located
in High Point.

From 1943 to date twenty two
chemistry degrees have been
awarded. Many of this group
are working in the chemical
laboratories of the industries of
High Point. During this same
period twenty-eight received their
pre-medical or pre-dental train-
ing, and of this number, ten have

become doctors and four have be-
come dentists.

The courses in chemistry are dif-
ficult, stress being laid upon the
fundamentals and thorough ground-
ing in the basic principles. An op-
portunity is given the student in
the senior year for elementary re-
search. Problems dealing with oils,
paints, bleaches and waterproof
coatings for cinder blocks have

been studied and worked upon in
the past. The result of all this
training is that the chemical stu-
dents have been able to compete
successfully with students from
other schools and have been able
to advance rapidly in their chosen
fields of work. The pre-medical and
pre-dental students who have com-
pleted their professional training
have all proved to be a credit to
both their professional school and
to High Point College. The chem-
istry department always has a
place for the ambitious, scholas-
tically minded, serious student who
would like to follow chemistry as
a profession, or who is interested
in pre-medical or pre-dental train-
ing.

EXPERIMENT COMING UP: Pictured is a scene from the chem-
istry stockroom, where Professor J. Harley Mourane, foreground,
and William Queen, chemistry major, are picking out material
to be used in a chemistry experiment.

NEW ATHLETIC DIRECTOR Pictured is C. Q. "Tex" Smith, new
director of athletics at High Point college. He will take over his
duties early in March, coming here from Georgetown college in
Kentucky.

We wish to extend our
CONGRATULATIONS
to
HIGH POINT COLLEGE
upon the inauguration of
DR. DENNIS H. COOKE
AS PRESIDENT

Few events occur during the life of a college which
are as important to the college or the community in
which it is located, as the installation of their Presi-
dent.

Even fewer opportunities arise for a business firm
to express their appreciation for the close associa-
tion which has existed over a period of years.

Therefore, we wish to take this opportunity to express
our most heartfelt congratulations to both High
Point College and Dr. Dennis H. Cooke and wish
them many years of mutual success and prosperity.

Chemistry Department Enjoys Excellent Growth

The chemistry department at High Point College has experienced a period of rapid growth in the past few years. The department is now one of the largest and most active in the South Atlantic region. The growth has been the result of a combination of factors, including the addition of new faculty members, the expansion of the department's facilities, and the increasing interest of students in the field of chemistry.

Students and faculty members are shown in the chemistry laboratory at High Point College.

Dr. Dennis H. Cooke, president of High Point College.

Dr. Dennis Cooke Spends Entire Life In Education

DR. DENNIS HARGROVE COOKE

President of High Point College. At precisely the hour of 3:30 p.m. on February 23, 1950, High Point College will officially have a new president. For at that moment Dr. Dennis Hargrove Cooke will have received the "Charge from the Board of Trustees" at the hand of the chairman, L. F. Ross, and will have then made his pledge of loyalty to its cause and purposes.

From that moment, also, the destiny of the 5-year-old local Methodist institution will lie for an unnumbered period of years in the hands of Dr. Dennis Hargrove Cooke. In general it is the consensus that the future of the college could not be in more capable hands for Dr. Cooke has spent his entire life in the field of education and few men have accomplished as much in so brief a span of life as has the 46-year-old newly inaugurated president of High Point College.

Dr. Cooke is a native North Carolinian, and before coming to High Point, the present home of his father, Avery L. Cooke, to receive one of the highest honors the city could bestow upon him, the presidency of its greatest cultural center, he has had a varied and useful career in the educational field. He has been an elementary school, classroom teacher; a principal of a high school and its football coach; a superintendent of schools; a college professor; the head of the education department at two separate colleges; a consultant in many states and areas in the nation for the public schools and colleges; now twice a college president; and an author and co-author of over 100 magazine articles and pamphlets, and 26 books ranging from a series of arithmetics for the eight grades of elementary school to professional books on all phases of curriculum development and administrative problems.

Dr. Cooke, the son of Avery L. and Alice Kerner Cooke, has two brothers and one sister. He was born in Maiden, North Carolina, also the home town of his wife, Gertrude Murray Cooke. It is interesting to note that he and Mrs. Cooke were childhood playmates and long time sweethearts. Dr. Cooke says, "I have never known the time when I was not in love with my wife. In fact, she was my only sweetheart through childhood, high school, and college, and many

were the "love notes and sweets" which passed between us in our schooldays."

"I believe he has one other love," responded Mrs. Cooke. "For he has always had a dog. Certainly 'Scottie' gets more attention than I." It is true that Scottie, a wire-haired terrier, finds a place under the president's desk at the college whenever he chooses to lie there and that he is a familiar figure on the campus of High Point College.

At home Dr. Cooke is a devoted father and a congenial companion to his two sons, Dennis Jr., a junior at Duke University, and Murray, a freshman at the University of North Carolina. In reminiscing Dr. Cooke says, "Perhaps the happiest days of my life were those spent with my two boys when they were about the ages of four, six, and eight years."

Dr. Cooke attended Maiden high school. Although a serious-minded student, he was also an active participant in basketball and baseball, and in the extra-curricular activities. He also played the cornet in the community band.

From Maiden high school Dr. Cooke entered Duke University, and after one year he returned to Maiden to teach in the elementary school to earn sufficient funds to continue his education. He proudly states, "I earned every penny of my expenses at Duke University and I literally 'piled' my way through college. I worked in the local drug store and I am certain that I rolled thousands of pills during my stay."

Dr. Cooke left Duke and for one year became the principal and football coach at Aberdeen high school. "That was one happy year," stated Dr. Cooke. "I took Mrs. Cooke there as a bride and I had a fine group of boys on my football squad."

From Duke University Dr. Cooke received the B. A. degree in 1925, and the M. Ed. in 1928. From George Peabody College for Teachers in Nashville, he received the Ph. D. in 1930.

Immediately before coming to High Point College as president on June 1, 1950, Dr. Cooke served as the head of the Department of Education and as the Director of the Summer School of Woman's College of the University of North Carolina at Greensboro. Previously, for thirteen months he was president of East Carolina Teachers College in Greenville, Ohio, where the greatest length of service of his teaching career was done at George Peabody College in Nashville, Tennessee, where he served 18 years—2 years as Instructor, 2 years as Associate Professor of Educational Administration, 8 years as Professor of Educational Administration, and 5 years as Head of the Department of Educational Administration. During his teaching career he also taught two summers at Duke University, and one summer session at the University of Michigan. At Peabody College he was a popular professor. During his 18 years of service, to his major students, he was a kindly, sympathetic adviser. His many students who have become outstanding in the field of education and in administrative offices throughout the nation are living monuments of service to the teachings of Dr. Cooke. In an advisory capacity he has served a large number of university and college presidents and public school boards. He has di-

JUST LOAFING: That's what the students pictured here are doing in the High Point College

Book store, a popular rendezvous.

rected or served as a member of many educational surveys, handling the administrative phases of the surveys of school systems of North Carolina, South Carolina, Mississippi, Louisiana, Kentucky, Georgia, Arkansas, and Texas. He was also a member of the North Carolina Commission Study which was recently made of the schools of North Carolina, and of the Survey of the Baptist Colleges of North Carolina.

Dr. Cooke is a member of many state and national educational committees including the research Committee of the North Carolina College Conference and is the General Editor of the Educational Trends Series of Books in Education. He has made educational speeches in 24 states and he prepared and administered south-wide educational administrators' conferences at Peabody College for 10 years, involving approximately 3,000 people each year.

He holds membership in the professional and honorary organizations of Kappa Delta Phi, Phi Delta Kappa, Southern Society for Philosophy, Psychology, and Education, American Psychological Association, American Educational Research Association, National Education Association, American Association of School Administrators, North Carolina Education Association.

He is listed in Leaders in Education, Psychological Register, The Southerner, Who's Who in American Education, Who's Who in America, Who Knows—And What. The best known of his publications are: The White Superintendent and the Negro Schools in North Carolina, Problems of the Teaching Personnel, Workbook in Problems of the Teaching Personnel.

**Gen. Marshall Speaks
In Behalf Red Cross**

NEW YORK, Feb. 18.—(AP) Gen. George C. Marshall, praising the Red Cross as an instrument for international peace, has opened that organization's national appeal for \$67,000,000.

The proposed budget is \$7,000,000 higher than last year.

Marshall, former secretary of state and now president of the American Red Cross, told 1,800 persons at a Waldorf-Astoria meeting:

"The cultivation of good faith and good will is of monumental importance and I know of no other organization but the Red Cross which has the power to spread the good faith and the good will which are essential to peace."

Fund collections begin officially March 1.

Anything That Can Be Cleaned—Can Be Cleaned Better By Us

Modern Language Dept. Means Much to High Point

By J. HOBART ALLRED
Professor of Modern Languages

At first thought it might not be realized that the High Point College Modern Languages department fulfills more than an academic responsibility as part of the college curriculum.

On the contrary it has been one reward of the department that it has been able to assist High Point business men and citizens in a variety of ways. Many letters, both business and personal, are translated for local residents. We are often asked for the correct pronunciation of words in the various languages. Furthermore, our teaching has not been confined to the college. We have found time to offer extension courses and adult education classes; it has been possible to tutor individual students and at times teach languages during the summer term of the local high school.

These opportunities arise because at the present time the language field of the three departmental professors embraces not only Spanish, French, Italian, German and Portuguese but also Greek and Latin.

The steady growth of the college has brought one challenge after another to the staff, small in numbers, and it is with genuine pride that we look back over the record. Our primary objective has been to serve the college, and to extend our efforts into the community as far as time and energy would permit.

The first year the college opened found this professor teaching French, Spanish and German. Obviously the work was too much for one person, and Professor N. P. Yarbrough joined the faculty the next year to teach French and German. His coming added strength to the department and we have

worked together harmoniously. Advanced courses were offered to permit majors in both French and Spanish.

As the years went by new duties were placed in the hands of my colleague when he became the registrar. Although his interests were divided between the office and teaching, his high quality and love for the classroom did not weaken. Mrs. Carol Dudley taught elementary Spanish for one year after the war. By that time the student body had grown large enough for another full-time professor, and Dr. David M. Driver was added for Spanish and French. His scholarly atmosphere and love for fine teaching and hard work brought more strength to the department.

For several years Spanish has been the most popular language at the college. This is perhaps because of our nearness to Latin-American countries. The literature of both Spain and Latin-America is taught in Spanish classes, and conversation and commercial Spanish emphasize the living language. To foment interest in Spanish-American countries, we have a Spanish club that meets twice a month.

Video Cameras Perform Tricks

NEW YORK—(AP)—The television camera, heart of which is an electron tube, is beginning to develop tricks that outstrip the movie cameras.

For instance, it can take one half an image while a companion camera supplies the other half, thus putting two images on the screen at the same time.

Also it can make it look like a person can walk through a solid wall, and accomplish numerous other seeming impossibilities.

HOME LIFE OF PRESIDENT COOKE: President and Mrs. Cooke enjoying a chat in their home.

Infirmary Able to Take Care Of Numerous Ill Students

Located in the west end of the Women's Hall is the infirmary of High Point College. It consists of one room, with two single beds, one small room for the dispensary, and a bedroom for the nurse. With this as a nucleus under the proficient supervision of Miss Myrtle Engen, nurse of High Point College, the infirmary serves the 300 students on the college campus.

To the girls in Women's Hall, and there are 89 of them, there is nothing that "Nurse Myrtle" can't cure and a visit to her is all that is required to cure all physical and mental ills. Her day extends over a 24 hour period, yet she is able to meet each new situation with a genuine interest, and best of all, with a winsome smile.

For the 211 men on the campus both at Penny Hall and McCulloch Hall, Nurse Myrtle is there whenever she is needed and is aided

by the pre-medical students in the boys' dormitory and by Mr. David Beallhwaite at Penny Hall. All in all, she has a man-size job and meets it admirably.

SQUARE FISH POUND

HAIFA, Israel.—(AP)—Wanna' do some square fishing? The finny ones come that way in the Gulf of Elath at Israel's southern-most tip — restly square.

A department of fishers' mission off Elath found many exotic-looking, inedible tropical fish, including one species that is perfectly square.

Says Marriage Ideas Spoiling American Women

GAINESVILLE, Fla. — (AP)—American women are spoiled, says Dr. Perihan Cambel, Turkish-born associate professor at the University of Florida. "In America," she says, "a woman thinks only of getting married. In Europe a woman thinks first of her career."

Here doing cancer research, Dr. Cambel says Turkish women who attend the Universities take military training in summer, learning marching, shooting, radar, nursing and food service, and many have entered aviation.

"But wrong ideas you have about Turkey do not compare with ideas we have about America. You have no conception of the warped picture of American life one gets from seeing only Hollywood movies. Everyone lives in skyscrapers, wears furs and there is gold in the streets."

Method of Choosing Cadets Is Criticized

WASHINGTON. — (AP)—Defense officials are studying a report recommending that congressmen be deprived of some of their power to choose students for West Point, Annapolis and a future air academy.

A board of top educators and military men — with President Robert L. Stearns of the University of Colorado as chairman and Gen. Dwight D. Eisenhower as vice chairman—submitted the report to Secretary of Defense Johnson yesterday.

The board rejected proposals for a single service academy and suggested that the air force proceed swiftly with plans for a school like the ones now operated by the Army and Navy.

No site was recommended for the new air force school, but the report said it should be started at a temporary site, if necessary, as soon as congress makes funds available. Some 195 proposed sites are being considered.

Speakers for Inauguration Hold Top Positions In Religious and Educational Worlds of the Nation

Six individuals who rank near the top in the cultural and spiritual world of this nation will be the speakers at the inauguration of Dr. Dennis H. Cooke as the third president of High Point College next Thursday afternoon at 2:30, when the college authorities hold one of the most impressive ceremonies in the history of the school.

Two of the speakers, Dr. Arthur Hollis Edens, and Dr. Goodrich Cook White, are presidents of two of the leading Methodist institutions of the country, Duke and Emory universities, respectively.

Dr. John Owen Gross, another speaker, is a former college president, University of Kentucky, and at the present time is executive secretary of the Division of Educational Institutions Board of Education of the Methodist Church.

Outstanding churchman, as far as this section is concerned, will be Bishop Costen Jordan Harrell, of the Western North Carolina Methodist conference.

J. Benjamin Schmoker, prominent Presbyterian churchman, a native of Iowa, and Leven Ferrell, of Asheville, chairman of the High Point College Board of Trustees, who will deliver the charge from the board of trustees round out the list of speakers. Biographical sketches on the speakers follow:

BISHOP HARRELL—Born in Gates County, February 12, 1885; educated, Sunbury Academy in North Carolina; Trinity College, Vanderbilt University, Randolph Macon college, Ashland, Va.; Duke University, Litt. D., Birmingham Southern college, ordained minister, Methodist Episcopal church, South, 1909; pastor, Nashville, 1909-1910; Raleigh, 1910-13; Durham, 1913-19; Wilson, 1919-20; Atlanta, 1920-25; Norfolk, 1929-33; Nashville, 1933-44; consecrated bishop in the Methodist church, June 24, 1944, and assigned as resident bishop, Birmingham area. Became bishop of Western Conference in 1948.

DR. EDENS—Born: February

14, 1901, Willow Grove, Tennessee. Education, Clay County Public Schools, Tennessee; Cumberland Mountain School, Crossville, Tennessee; Emory University, University of Chicago, Harvard University, Career, Teacher, Clay County Public Schools, 1919-21. Teacher, Cumberland Mountain School, Crossville, Tenn., 1926-28. Principal, Cumberland Mountain school 1930-37. President and associate professor of history, Valdosta Junior College Division of Emory University School of Business Administration, 1933. Associate Dean of Undergraduate Divisions of Emory University, 1942-46; Associate Professor of Political Science, Dean of Administration of Emory University, 1946-47. Vice Chancellor, University System of Georgia, 1947-48. Associate Director, General Education Board, 1948. Elected president of Duke University, Nov. 19, 1948. Inaugurated president of Duke U., Oct. 22, 1949.

DR. WHITE—Born, Griffin, Georgia, Nov. 13, 1889. Education, A.B., Emory College, Oxford, Ga., 1908; A.M., Columbia University, 1911; Ph.D., University of Chicago, 1927; LL.D., University of Chattanooga, 1947; LL.D., Hamline University, 1949. Professional Experience: Professor of English and Instructor in Psychology, Kentucky Wesleyan College, 1911-13; Professor of Psychology and Education, Wesleyan College, Macon, Georgia, 1913-14. Professor of Mental and Moral Science, Emory College, 1914-18. Associate Professor of Psychology, 1919-20. Professor, 1920-42. Emory University, 1920-42. Vice President, 1939-42; President since 1942.

DR. GROSS—Clergyman and educator; born Grant County, Kentucky, July 9, 1894; A.B., Asbury College, Wilmore, Ky., 1918, D.D., 1930; Lane Seminary, Cincinnati, Ohio, 1918-19; S.T.B., Boston University, 1921; graduate study, University of Cincinnati, and University of Kentucky, 1929; L.H.D., Union College, Barbourville, Kentucky, 1938; L.H.D., Mount Union College, Alliance, Ohio, 1946; LL.D., West Virginia Wesleyan College, Buckhannon, W. Va. 1946; Litt. D., Florida Southern College, Lakeland, Fla., 1947; married Harriet Bietzer, June 30, 1920; children—George Albert, John Birney, and Harriet Lucille. Entered ministry, Methodist Episcopal Church 1916, ordained deacon, 1918, elder, 1921; pastor First Methodist Episcopal Church, Barbourville, Ky., 1921-25; district superintendent Barbourville District, Kentucky Conference, Methodist Episcopal Church, 1925-29; president Union College, Barbourville, 1929-38; president of Simpson College, Indianola, Iowa, 1938-41; member Iowa State Board of Educational Examiners, 1940-41; secretary Department of Educational Institutions, Board of Education of the Methodist Church, 1941-48; executive secretary, Division of Educational Institutions, Board of Education of the Methodist Church since October, 1948. Member Ecumenical Conference, Atlanta, Georgia, 1931, General Conference, 1932, North Central Jurisdictional Conference, 1940, Iowa Des Moines Conference, 1940; chairman board ministerial training, Kentucky Conference, 1939-38. Executive secretary of University Senate of the Methodist Church; Member N.E.A., Association Colleges and Universities of

Kentucky (president 1930), Upper Cumberland Educational Association (president 1934-35), president National Commission on Christian Higher Education 1944.

J. BENJAMIN SCHMOKER—A native of the state of Iowa, he completed his undergraduate work at the University of Minnesota, followed by graduate work, first in the field of history and later in psychology. He served as a special lecturer at Hamline University, St. Paul, Minnesota, a co-educational college affiliated with the Methodist church. In 1932 he became the executive director of the YMCA of the University of Minnesota and was responsible for the formulating of a guidance program affiliated with the personnel department of the university. In 1935 he was appointed coordinator of religious activities of the University of Minnesota. During the war years he served with the Emergency College War Commission and was responsible for a manual on guidance and group activities used widely by military trainees on college campuses. In 1942 he became the Program Executive of the Metropolitan Board of the YMCA of Minneapolis. In 1946 he accepted the executive di-

J. B. SCHMOKER

rectorship of the national committee on friendly relations among foreign students. This committee, formed forty years ago by Dr. John R. Mott, Andrew Carnegie, Cleveland H. Dodge, William Sloane and others, is concerned with the personal needs of students in residence in American colleges and universities. He also represents the World's Alliance of YMCAs as a special consultant to the economic and social council of the United Nations. Mr. Schmoker is a member and elder

College Plays Big Role In City's Economic Life

To the credit of High Point citizens who envisioned and worked in 1924 for the establishment of a college here, it may be said that only minor emphasis was placed on the prospective institutions as an economic asset.

The original handful of zealous townspeople looked on a college as an educational opportunity, a cultural center, an aesthetic asset with beautiful buildings, an expansive campus and attractive landscaping, all of which has come true.

But the financial dividend which High Point College has paid is too obvious to be overlooked.

While generous local well-wishers subscribed almost a quarter of a million dollars in cash, in four financial campaigns between 1924 and 1945, college operations and students' expenditures are estimated at twenty times the cash subscriptions. Thus between four and five million dollars have flowed through local commercial and banking channels as a result of locating the college in this city. Dormitory students of course spend more locally than those who

commute from nearby cities, or local young people who attend classes and live at home. Omitting the two latter groups, college authorities calculate that at today's price levels a student living on the campus makes personal expenditures of \$150 to \$175 in a college year. In the current year these students alone will represent trade of some \$50,000 in local retailing channels.

On the same basis of expenditures it is estimated that since the establishment of the college, students have spent between a million and a quarter and a million and a half dollars in High Point. This takes no account of the "commuters" who, although living within convenient riding distance but in other centers, buy various items here ranging from small miscellaneous articles to more expensive merchandise such as clothing.

In an actual calculation made in the mid-forties it was disclosed that the college itself was an important customer of local suppliers, both retailers and wholesalers. Purchases for cafeteria operation run into a substantial figure. Supplies

PRESIDENT'S HOME: Pictured is the home of college, who are busy preparing for the inauguration of Dr. Cooke as college president Thursday. President and Mrs. Dennis Cooke, of High Point.

for classroom, departmental and building use represent a considerable sum. Salaries for college principals and compensation for employees increase the total until in all it is calculated that the institution itself is a source of more than \$125,000 annually.

Another economic value of High Point college is particularly emphasized for local families whose sons and daughters find both convenience and economy in attending the college here at home. Presumably their expenditures at an out-of-town institution of the kind would be at least \$175 for personal purposes. With 212 registered in the first semester of the 1949-1950 college year from High Point alone the saving to local families is obviously substantial and the student purchasing power has been enjoyed in local business circles. Considering that in excess of 600 High Point young people have graduated at the college, it is estimated that well in excess of \$100,000 has remained in this city which otherwise would have been distributed in other college towns.

As a value within itself High

Point college has advanced materially since those days when it was launched with the gift of real estate for a site, and \$50,000 in cash. Including buildings, equipment, real estate, and endowments which provide a certain amount of income for operating purposes, college authorities appraise all capital assets as just short of a full million dollars.

REAL ESTATE—SEE

Newsprint Rationed By Argentine Govt.

BUENOS AIRES, Feb. 18.—Argentine's government has again taken over distribution of newsprint to the country's papers.

The government seized all newsprint stocks yesterday and said it would impose future paper shipments until a shortage is overcome.

Similar action was taken last year. The government said then it sought to conserve Argentina's scarce stock of dollars.

The capital's independent newspapers, La Nacion and La Prensa, each will lose an estimated 3,000 tons of paper.

College Plays Big Role In City's Economic Life

High Point College, one of the largest and most influential educational institutions in the city, is playing a significant role in the economic life of Astoria. The college, which is a member of the National Association of Colleges and Universities, is a major employer in the city, providing jobs for many students and faculty members. The college's presence in the city has led to the development of new businesses and services, and has helped to create a vibrant and diverse community. The college's commitment to education and research has made it a leading institution in the field of higher education, and its impact on the city's economic life is undeniable.

ROBERTS HALL (ADMINISTRATION BUILDING)

In Appreciation

To all the citizens of High Point, who, by their financial aid have supported High Point College from the initial gift of a tract of land and \$100,000 to bring the college here twenty-five years ago, through campaigns for funds, and for many individual gifts of large and small amounts. To the even larger number of citizens who have given evidence of their faith in The College by enrolling their sons and daughters as students, and to all others, who have, by words and acts, supported the institution.

To the churches of the city for their prayers and spiritual help and guidance. Especially, to the "Mother-Church," the First Methodist, formerly the First Methodist Protestant Church, whose members and pastors, from the beginning, have loyally and faithfully supported the college in every way. To all the Methodist churches, which, since the union of Methodism, have been even more zealous in their periodical and systematic financial aid, as well as in their assistance in other ways.

To the loyal and devoted alumni, who, though young and relatively small in number, have given to The College both a visible and a moral support which could be coveted by many an older institution.

To every agency and individual in High Point, which has helped High Point College to grow from a small, struggling college with not a tradition except the faith of its founders into an institution of importance, a center of the education and culture of High Point, to which every citizen of High Point may look with justifiable pride.

To you all our sincere and enthusiastic appreciation.

HIGH POINT COLLEGE

UNIVERSITY SQUARE, UNIVERSITY SQUARE

In Appreciation

Thank the names of the High Point College Faculty and Staff who supported High Point College from the beginning of a time of great change in the college's history. They were the ones who made the college possible for those who have been enrolled in it. They were the ones who made it possible for the college to be the college it is today. They were the ones who made it possible for the college to be the college it is today. They were the ones who made it possible for the college to be the college it is today.

To the students of the college who have supported and sustained the college. They are the ones who have made the college possible for those who have been enrolled in it. Home Economics Is More Than Science of Cooking

By MISS ADA B. JOHNSON
Head of the Home Economics
Department of High Point College
Home Economics at High Point
College is one unit of the very
great Home Economic movement
which began over fifty years ago
and is now international in its
scope. This movement in Home
Economics began at the requests
of the homemakers themselves and
receives its great strength and
support from today's home makers
who are looking toward "New Hor-
izons for the Family."

As college authorities view it, the
science of Home Economics is not
more than just cooking and sew-
ing classes. There are over one
hundred positions open to home
economics trained people. Develop-
ments are taking place constantly
in all the different phases of Home
Economics.

Control of Foods
There are studies in "time and
temperature" control in modern
foods. We know how to cook to
save vitamins; to plan layouts for
rooms, for schools, kitchens; to
save time and fatigue in steps
while at work; and to install elect-
ric equipment in rooms for effi-
ciency.

High Point college uses the Five-
Year-Bond-Plan in obtaining elec-
tric equipment for the Home Econ-
omies department. This plan gives
up-to-date models each year.

High Point College gives the
basic courses in Home Economics
which are required by the state of
North Carolina for the "A" State
Teacher's Certificate which her
graduates receive from the State
office of Education at Raleigh.
High Point College Home Econ-
omies courses are taught on the
basis of giving girls training for
homemaking. These courses cover
the fields of foods, clothing, house-
planning, interior decoration, home
management, child development,
new horizons for the family, econ-
omies of the home, nutrition, and
methods for teaching homemak-
ing. Other courses in dietetics, or-
ganization, and management of
cafeterias, textiles, and dress de-
sign are also offered.

In the practice house group this
spring of 1950, we have the pre-
sent seniors and also a returned
senior who stopped for two years
and now comes back to complete
her course. Her two-year-old boy
held her up for two years. She re-
alizes the value of her work here
and wishes to finish her degree,
The students live six weeks on a
low income budget, and a moderate
income budget, and study how to
meet the nutritional requirements
in all the food groups at these
budget levels. They also study ef-
ficient room layouts in the kitchen.
The make time and fatigue studies
of different methods of doing work

and planning the home duties. Child
development is uppermost and a
separate course is included in the
many studies for their degree.

New Homemakers
High Point College graduates in
home economics have held, in the
past nine years, the following dif-
ferent kinds of positions. At the
top of the list we must put New
Homemakers, as we find that with-
in two years of graduation, most
of them are homemakers. Some
are ministers wives. Some direct
school cafeterias. Many are teach-
ers and some are dietitians. We
have both hospital and army dieti-
tians. Several have been Federal
Food Inspectors. Others have been
models. XWCA workers, U. S. Ex-
tension workers, National Dairy
Council Workers, and two have
gone into independent business.
(The Powell Candy Shop in Win-
ston-Salem and the Hester Nur-
sery School in Greensboro). Two
are doing graduate study. One
graduate is in a restaurant chain.
Many are mothers.

In the last nine years, there have
been 45 graduates in home econ-
omies from High Point College, mak-
ing an average for the past
nine years of five graduates per
teacher per year. This number of
graduates is higher than the aver-
age per teacher per year in the
large institutions. In fact, it is higher
than the average number of
graduates of all the home econ-
omies departments.

Over a period of nine years,
High Point College has had an
average of five home economics
graduates per teacher, per year.
In 1948 in the co-ed institutions,
the home economics majors num-
ber nearer 10 per cent of the total
women enrolled. High Point col-
lege meets this requirement of 10
per cent of girls enrolled and some-
times has exceeded this ten per
cent.

High Point college uses the "Jack
and Jill Nursery" in High Point
for the child development classes
and also maintains a practice house
for its senior girls.

All in all, the Home Economics
department at High Point College
is equal to, and sometimes exceeds
the accomplishments of larger and
notion that give Home Economics
richer endowed institutions in the
training.

Popular Fish

PITTSBURGH, Feb. — (INS)—
The popularity of fresh-water fish-
ing in the United States continued
its upward spiral during the 1948-
49 fiscal year ended last June 30.
Fresh-water fishing in Pennsylv-
ania showed a slight increase dur-
ing the year, when the state sold
611,677 permits to anglers for \$1,
230,000.

CHILD DEVELOPMENT: Child development is large, as the above picture reveals. It shows a student in the home economics class at the college studying the development of a youngster.

Miss Truman Not Seeking Career

MIAMI, Fla., Feb. — (AP)—Margaret Truman says she isn't plan-
ning a career with the Metro-
politan Opera Company.

"Published stories that I plan a
career in grand opera now simply
aren't true," said the President's
daughter, here for a weekend sing-
ing engagement.

The blonde soprano admitted she
occasionally has dates with
"friends" but denied there is any
romance in sight.

"All romance at present is tied

up with music," she said. "I'm
much too busy to think of anything
else."

Miss Truman said her present
tour will take her to Texas, Ariz-
ona, Ohio and other states before
she returns to Washington in April.
"I've been working so hard—I
sing two or three hours a day—I
I'd forgotten about my birthday,"
she said when asked if there were
any special plans.

She is 25 years old today and
will cut a birthday cake at a re-
ception in her honor.

Teen-Age Girl Wins

Bout With Attacker

CLEVELAND, Feb. — (AP)—A girl
teen-ager who learned wrestling
tactics by watching television rout-
ed a street thug recently.

Marion Vilt, 17, told police that
when the man grappled with her,
"I grabbed his index finger and
bent it back hard. He let go and
I punched him twice. He ran one
way and I ran the other."

She also credited her brother,
Don, a football player for Bow-
ling Green University, with teach-
ing her some of the tricks.

Best of Luck

DR. COOKE AND THREE BROTHERS: Pictured are Dr. Dennis Cooke and his three brothers. The present college president was 10 years old at the time the picture was taken. Seated, Chester Cooke; left, Reid Cooke; right, K. B. Cooke; Dr. Cooke standing back of shade.

Speakers Are Leading Educators

(FROM PAGE FOURTEEN)

In the Presbyterian church U.S.A. He is a frequent platform speaker at summer conferences of church groups and related agencies. He is the author of many articles largely dealing with the problems and needs of youth. He serves as a member of the Board of the National Association of Foreign Student Advisers.

LEVIN FERRER was born in Randolph county and spent the most of his life in Asheboro. He was educated in the public schools of Asheboro and at the University of N. C. at Chapel Hill. In his early life Mr. Ross taught school for a while but did not continue in that profession. While he did not remain in the teaching profession a good portion of his life has been closely associated with schools. For twenty-five years he was chairman of the Board of Education for Randolph County, having resigned from that position only a year ago. During his long tenure in office Mr. Ross saw the school system in Randolph county grow from the many one teacher schools to the larger consolidated schools. Not only has Mr. Ross been interested in education but he has been interested in religion as well. Ever since his boyhood days he has been an active member of the Central Methodist Church in Asheboro. He was at one time president of the Randolph County Sunday school association and attended the World Sunday School Convention in Washington, D. C. He is a former director in the Asheboro Merchant's Association, he is a director in the Asheboro Chamber of Commerce, a member and former president of the Asheboro Rotary club, and a director in the Randolph Hospital Inc. He has been a member of the Board of Trustees of High Point College for some fifteen years.

Self-Support

LAWRENCE, Kas., Feb. 17.—(INS)—A survey disclosed that nearly one of every five Kansas University coeds is self-supporting. Miss Martha Peterson, assistant dean of women, announced that part-time work and help from the GI bill of rights provide about half the "earned help" the coeds get.

The Marine Corps has its own correspondence school and instructions in some of the arts, trades and sciences is given leathernecked anywhere they may be stationed.

AERIAL VIEW OF HIGH POINT COLLEGE: Pictured is an aerial view of High Point college and the picture is a far cry from the way the campus looked 25 years ago. This is the way it looks

today, four days before the inauguration, Thursday, of Dr. Dennis Cooke as the third president of the college.

President Cooke Maps Course Of College for Next 10 Years

By **DR. DENNIS H. COOKE**
President, High Point College

In this rapidly changing world, with its atomic and hydrogen problems, one is bold if not foolish to try to pull aside the veil and see very far into the future. I have, therefore, restricted my gaze to a ten-year period at the conclusion of which we can take another look.

We do not have our hearts set on "bigness" here at High Point College; neither are we against it. We are an institution of between seven and eight hundred students. This is all we can handle with our present facilities, and do a good job.

We are not allergic to becoming a larger institution, but we must "get better" before we have a right to "get bigger." If our friends give the College enough money to expand and to improve our program, we shall become both "bigger and better." But if we must choose between becoming "bigger or better," as it appears we must until larger funds are in sight, we must become "better."

For the next ten years, therefore, emphasis should be placed upon development of our present program rather than expansion. Considerable effort should be devoted toward im-

proving our academic structure which has been good, but it should be made better. All departments should be improved and strengthened, and as many instructors with advanced graduate degrees should be added as we can afford.

SUN IN LONDON

LONDON, Feb. 17.—(P)—The sun finally broke through to London today. It was the first rainless forenoon in the last 17 days.

Luther Burbank experimented with popping sorghum like corn.

Music Plays Major Role In H. P. College Life

By ALBERT J. WOOD,
Head of the Music Department
High Point College

It is 10:20 a. m. any Tuesday morning at High Point College. The whole school is assembled in the large Harrison Gymnasium. Little by little the "crowd" noises subside to a hush of anticipation. Then, almost imperceptibly, you are aware of voices, soft and sweet, raised in a chorus of lovely harmonies. It is the College Choir engaged in one of their principal duties, opening the weekly all-college Assembly. Thus, music touches, and affects the lives of the entire High Point College family.

Rather unique opportunities are offered to the music student at the college. In spite of the fact that the full - time teaching staff numbers only two, there is a wide

selection of courses to choose from. Should a student want to compose, courses in this field are offered, — all the way from elementary harmony to counter-point and free composition. If he aspires to be a choral, band or orchestra director he may register for conducting, and along with practical instruction in this interesting art, receive actual practice in handling instrumental and choral ensembles. Private instruction in piano and voice is available to anyone whose talent warrants the intensive effort it takes to develop a first-rate soloist.

Is there any study so fascinating, and so rewarding, as music? Considering the great "kick" that musical performers so obviously get from the exercise of their art, the general public is hardly to be blamed for imagining that music

COMMITTEE CHAIRMEN: Pictured are the chairmen of the three major committees arranging the inauguration of Dr. Dennis Cooke as president Thursday. Left to right, Horace Ha-

worth, general chairman; Miss Ruth Steelman, chairman of committee on arrangements; and Dr. C. R. Hinshaw, chairman of committee on invitations.

study is just a series of gay experiences, requiring but little effort.

Producing music is most certainly an enjoyable, rewarding experience, but let no one think that the skilled player, the inspiring singer, or the successful composer "got that way" without many, many hours of concentrated effort. For verification of this statement one would only have to ask a member of the Counterpoint class, or talk to a perspiring pianist who has just been trying to master the intricacies of a Bach fugue, or get the opinion of a member of the college Choir after a particularly grueling rehearsal.

Being almost an infant, as colleges go, High Point naturally looks forward to the time when it will have achieved full maturity. May we, then, paint an imaginary picture of the Department of Music at High Point College in the year 19-?

First, the building and facilities. The department will be housed in

a beautiful and imposing civic auditorium, prominently placed on the campus. In addition to sound-proof studios and practice rooms there will be several rehearsal halls large enough to accommodate the personnel necessary for any theatrical production. There will be a fine concert organ, with a movable console. The stage will be spacious, and will have all the modern devices of stage craft needed for the presentation of concerts, plays, oratorios, and operas. The faculty will consist of six (or more) competent musicians, each expert in his field. Concerts

by faculty members and visiting artists will be a regular feature of High Point's musical life. The college will not only be a center for the training of music teachers, but will be the focal point for serious musical activity in this part of the state.

A dream? Perhaps, — but all that man has built started as a dream, or a mental concept, if you will. Already the first steps have been taken toward making this dream reality. Some time this spring work will begin on a temporary Music Building. Ten years from now, — who knows?

MUSIC MAJOR: Pictured is Miss Frances Dearman, a music major student.

Woman Granted Quick Divorce for Desertion

LONDON, Feb. —(2)—Mrs. Lillian O'Leary testified her husband, Patrick, deserted her just 30 minutes after their marriage in October, 1946.

"How long were you engaged?" asked Judge Tudor Rees.

"Eight months," said Mrs. O'Leary.

Judge Rees granted her a divorce with the comment:

"A case of a man marrying at leisure and repenting in haste."

Mathematics Department Keeps Pace With Times

By LOUISE ADAMS
Assistant Professor of Mathematics, High Point College

When High Point College first opened its door to students in September 1924, Dr. McCulloch was head of the Mathematics Department. Dr. McCulloch was a native of Guilford County, North Carolina, and a graduate of Adrian College, Michigan. Dr. McCulloch was a very versatile person, a minister, a teacher, the editor of a church paper, and a mathematician of exceptional ability.

Dr. McCulloch offered a variety of higher mathematics courses for the 132 students enrolled at High Point College during the first year of operation, but he taught only one year, returning to Greensboro to devote all his time to editing The Methodist Protestant Herald.

Mr. Walter F. McCandless came to High Point College in 1925, and was head of the mathematics department for several years. The

first graduating class in 1927 had one mathematics major, Cleo Harrell, who is now Mrs. Jester Haynes. During the next five or six years several students majored in mathematics and went directly into the teaching profession. Others who majored in mathematics went into business fields while still others went to graduate schools to take further work in mathematics.

I was a member of this last group. I came to High Point College, my Alma Mater, to teach mathematics in 1933 and during the next few years the department was reorganized to provide both a major in mathematics and the necessary background courses in mathematics for the chemical engineers.

The following mathematics courses were offered to meet these needs: College Algebra, Trigonometry, Differential Calculus, Integral Calculus, Advanced Calculus, Advanced College Algebra, Introduction to Modern Geometry, Theory of Equations, Differential Equations, and Engineering Drawing.

During the years from 1936 to 1941 approximately forty students were graduated with majors in mathematics or teachers certificates in mathematics. Some are still teaching in the public schools of North Carolina while many went into government work or war industries during the years following 1941.

In 1939 High Point College was selected by the Civil Aeronautics Administration as one of the several colleges to offer the Ground School work for their Civilian Pilot Training Program which later became War Training Service. This added course in Air Navigation and later one in mathematics for pilots. During the next few years approximately 175 people were enrolled in these Air Navigation courses.

RAT WEEK: It doesn't take a man with good eyes to tell you this is a picture of Rat Week at High Point college. Freshmen are given a warm reception in more ways than one by upper classmen.

Work Begins Soon On N. C. State Buildings

RALEIGH, Feb. 19.—Construction will start soon on a four-story agronomy building and a new house for greenhouses at N. C. State College.

Bids on the projects were opened at the college yesterday, and college officials said contracts will be awarded within a few days.

Low bids on the structures totaled \$946,538. This covered general construction and installation of heating, plumbing, electric systems and other facilities.

A total of \$1,238,000 was appropriated by the general assembly for the two projects and the equipment for both.

A unit of the Air Corp College Training Detachment was sent to High Point College in the spring of 1943. Each cadet in this training detachment had to have eighty hours of mathematics including arithmetic, algebra, geometry, and trigonometry. This meant that during the next fifteen months the mathematics department gave approximately 650 individual cadets 80 class hours of mathematics. Also for 12 months 40 cadets were given 20 class hours of Air Navigation each month.

During the period that the College Training Detachment was at High Point College, R. L. Weaver from Oak Ridge taught the mathematics courses for the regular college students and Dr. C. R. Hindsaw and I taught the mathematics courses for the College Training Detachment.

Since 1945, the function of the mathematics department has been

three-fold. Mathematics is not a required subject. Science majors are required to take a few mathematics courses for background material. The business administration majors take certain related mathematics courses. Then there is the group of students who major in mathematics and those who enter their teacher's certificate in mathematics. During the college year 1948-1949, High Point College graduated ten with majors in mathematics. Six of these graduates

are now teaching in the public schools of North Carolina. The other four have responsible positions in business concerns.

At present courses offered by the department include: College Algebra, Trigonometry, Analytic Geometry, Advanced Analytic Geometry, Differential Calculus, Integral Calculus, Advanced College Mathematics, Introduction to Modern Geometry, Theory of Equations, Differential Equations, History of Mathematics and Navigation.

Mathematics Department Keeps Pace With Times

The Mathematics Department at High Point College has been keeping pace with the times by offering a variety of courses that meet the needs of the modern student. The department has a strong faculty of experienced mathematicians who are dedicated to providing the highest quality of instruction. The department's facilities are state-of-the-art, and the department is committed to providing a challenging and rewarding learning experience for all students.

THE NEW COLLEGE

The New College is a leading institution of higher learning, offering a wide range of undergraduate and graduate programs. The college is committed to academic excellence and provides a supportive environment for students to thrive. The college's faculty is composed of highly qualified professionals who are dedicated to their students' success.

3 Full-Time Professors In History Department

By DR. STUART C. DESKINS
Head of the History Department
of High Point College

From a small beginning with one professor, Paul S. Kennett, and with only a few students, the history department of High Point college has grown until it now has three full time professors, Dr. Helen R. Bartlett, Dr. Richard C. Todd and Dr. Stuart C. Deskins, who have more than four hundred students in their classes. This increase in staff and students has given the department the opportunity to perform a vital role in the college and in the surrounding community.

In their wider service to the community, the history teachers frequently deliver lectures and speeches on historical subjects before various civic, church, educational and historical groups; they often contribute articles to historical journals, magazines and newspapers; and they all belong to different historical associations at whose meetings they represent the college and participate in the programs.

Research, Surveys

The history professors also serve the college and the profession in general through research and surveys. A survey in Sociology for Vanderbilt University is now in progress. And since the holidays, the department was invited by Dr. Benjamin Fine, Educational Editor of The New York Times, to take part in a nation-wide survey on the significance of the teaching of American history. Dr. Fine's summary will soon appear in The New York Times, and will probably provoke as much discussion as did his similar article in 1942.

While these off-campus contacts, lectures, writings and research reports all constitute an important role of the history department, its main function is to give effective instruction and sympathetic guidance to the large number of students enrolled in its courses. To this end, the department offers courses in the various phases of European history, in our English heritage, in Sociology, in Federal and State government, and in the development of our American way of life.

Sound Scholarship

In all courses, lectures and dis-

cussions, the main emphasis is placed upon sound scholarship, practical application and interpretation of historical facts, and an abiding appreciation of the fundamentals of Americanism; individual initiative, free enterprise, freedom of press and religion, and the right and duty of each individual to take an active, intelligent part in the processes of democracy.

That this vital role is being successfully accomplished, is evidenced by the fact that the students direct their International Relations Club, attend and take part in regional and national conferences, present chapel programs on historical subjects, give radio programs on national and international topics, serve as substitute teachers in the local schools, prepare to become social science teachers, lawyers and members of other professions; and, above all, intend to serve their college and community as alert, progressive American citizens.

Training of Teachers Objective of College

By DR. C. R. HINSHAW
Dean of Instruction,
High Point College

One of the primary objectives of High Point College from its very beginning has been the training of teachers for the public schools of the state and nation. Eleven of the thirteen graduates in the first class received teachers' certificates. From that small class in 1927 to the 270 graduates in the 1949 class approximately 60 per cent of the graduates have received their teacher's certificates. Until the close of World War II, 64 per cent of the graduates prepared to teach. But the large number of G. I.'s who enrolled after their discharge, most of whom are planning for a business career, caused a reduction in the percentage of prospective teachers. There is, however, a very noticeable tendency, due probably to better teacher pay and fewer opportunities in business, for more

and more men as well as women to prepare to enter the teaching profession.

The department of Education and Psychology offers all the professional courses required by the state for the primary, grammar grade and high school teachers' certificates. In addition to the required courses in the school, the pupil, and teaching and practicum, a large number of elective courses are offered in education. A variety of courses are offered in psychology. General psychology is the beginning course. It is followed by abnormal psychology, social psychology, adolescent psychology, child psychology, educational psychology, psychology of personality, psychology of the exceptional child, and mental hygiene.

The college is able to offer such a variety of courses in education and psychology because it has a well trained and an adequate teaching staff. For the first year or two after the opening of the college only one person was employed in the department. Now there are six.

The training of teachers is by no means restricted to the Department of Education and Psychology. It simply offers the professional training courses and gives professional advice as to the proper training in the various subject matter fields. At the present time the college is training high school teachers in the following subject matter fields: Bible or religion, commerce, English, French, home economics, mathematics, music, physical and health education, science, and the social sciences. It also gives excellent training for the primary and grammar grade certificates.

Of the more than 1000 graduates who have received teachers' certificates, some are teaching in colleges, some are school superintendents, some are high school or elementary school principals. But most of them are classroom teachers located throughout the state and in many other states.

TRACES OF EARLY MAN

TÜBINGEN, Germany — (AP) — A large cave which may reveal traces of human beings who lived 300,000 to 500,000 years ago has been discovered here. Experts found the bones of giant bears and other bones which may have been the remains of early man.

Tuebingen has 100 miles south of Heidelberg, where the remains of the "Heidelberg man," who lived about 600,000 years ago were found.

Congratulations

CECIL'S
OFFICE EQUIPMENT
COMPANY

Los Angeles Plans Heliport

LOS ANGELES — (AP) — Los Angeles will have the most modern helicopter airport in the country, postal officials say. Helicopters have been used on mail runs in Los Angeles County for several years. Now the post office is building the nation's first heliport, strictly designed as such, atop one of its buildings.

A new roof of reinforced concrete is being laid over a framework of reinforced steel. This will be topped by a 1 1/2 inch cushion of sand and a lightweight slab of cement to absorb the shock of pancake landings.

Fraud Is Found In Jobless Pay

SALT LAKE CITY —(AP)—Cases uncovered by Utah's "fraud unit" have led a department head to conclude that "a lot of people don't think it's a crime to cheat their government." The three-man unit is a part of the state department of employment security. Its job is to find any illegal claims for unemployment compensation.

One young man was receiving unemployment compensation payments in a small town while working in Salt Lake City. The boy's mother forged his name to papers in connection with the case and three officials of the town government swore that the handwriting was that of the boy himself.

Two carpenters continued receiving unemployment compensation after they went to work. "When we filed charges we got a letter from the defendants' attorney calling us 'Russian commissars' and so forth and informing us it was none of our darn business what his clients were doing," said Curtis F. Harding, department administrator.

HARRISON GYMNASIUM: Pictured is the Harrison gymnasium, where many a hard-fought basketball game has taken place. The

gymnasium affords ample growth for physical education at the college.

Physical Education Role At College Is Major One

By ARTHUR PASCHAL,
Director of Physical Education
The department of Health and Physical Education of High Point College strives to give all students a well planned program and physical and extra-curricular activities. For those with specific interests, a primary function of the department is to present the fundamental principles of teaching and directing group activities, competitive sports which experience will enable the students to take an important part in the State of North Carolina as teachers in the fields of health education, physical education, and community recreation programs.

Fifty per cent of the student body participates in the intramural program which consists of touch-football, basketball, volleyball, ball, soft ball, tennis, ping pong, and horse-shoe pitching.

The activities that are taught in the gym classes include team games and individual sports of square dancing, folk dancing, modern dancing, basketball, volleyball, archery, weight lifting, soccer, golf, tennis, wrestling, tumbling, swimming and boxing.

In addition to the activities theory courses that are offered include — Corrective Physical Education, Principles of Physical Education, Organization and Administration of Secondary School Athletics, Materials and Methods, Intramural and Extra-mural Activities, Health Education, Community Education, History of Physical Education, First Aid, and Theory of Coaching Varsity Athletics.

Dorothy Arnette working with Mr. Paschal is the director of physical education activities for the girls of High Point College.

TUMBLING CLASS: Pictured is an action scene in a tumbling class in Harrison Gymnasium. Strong muscles help to make strong minds, hence the stress upon tumbling.

Says Russia Has Jet Fighter As Good As F-86

WASHINGTON, D. C.—American Aviation Daily, a trade letter, reports that Russia has in service a jet fighter ranking with this country's F-86 Sabre, holder of the world speed record at 671 miles an hour.

The Daily said its information came from British sources.

It reported the Russian plane tentatively identified as the Yak-21, has been assigned to squadrons based near Moscow.

The Yak-21 is believed to be powered with an improved version of the Rolls-Royce Nene engine, a considerable number of which were sold to Russia by the British. The Russian type develops "well over 5,000 pounds" thrust (a pound of thrust equal one horse-power when the plane is moving 375 miles an hour), the Daily said.

The fighter was reported to have a top speed of 600 miles an hour and operate above 45,000 feet (over eight miles up). Armament was reported to be four 20 mm. cannon.

The Daily commented that appearance of this fighter "tends to support American observers."

Black Market In Privileges

BERKELEY, Calif.—(AP)—Indian tribes of the north British Columbia coast now have a black market in privileges says Dr. Ronald L. Olson, professor of anthropology at the University of California says.

In these tribes, he says, the highly prized things of life are ceremonial titles or names. They carry the right to perform certain dances, to sing certain songs, to erect totem poles and to give feasts. These titles used to be controlled by a noble cast and were handed down in families.

Now, however, the white man's civilization and diseases has reduced the tribes to a fraction of their former numbers. Some of the old titles have been inherited by commoners who used to share in them only as poor relations. Some of the commoners think more of what the titles will bring on the market than of the privileges. Therefore they sell the legends and songs which validate the privileges much as deeds, copyrights and patents validate ownership in the white man's society.

correct the impression of Russian equipment inferiority held by United States American observers."

Artificial Rain Filling Southern California Basins

SAN BERNARDINO, Calif.—(AP)—They're making a lot of rain in the Sierra Nevada range, and it points the way to solution of Southern California's biggest problem—water.

The California Electric Power Co., which services Southwest California and Nevada, says it has increased by 12 per cent the amount of water in its storage basins west of Owens Valley. The method used was dry-ice seeding of moisture-laden clouds.

Project engineer S. A. Cundiff estimated that the actual extra water precipitated into the basins was about 6500 acre feet, or an eight month's supply for a town of 50,000 people. In terms of power, when harnessed to six generating kilowatts, it could supply 14,500,000 kilowatts, or three months electricity for the same city.

Cundiff thinks the trick of producing extra rainfall can be useful elsewhere in Southern California, too.

Colleges Need Money to Keep Moving Along

By KENNETH GOODSON,
Pastor of First Methodist Church

Colleges all over the country are finding it increasingly difficult to keep the wolf away from their doors. More and more they are sending out their appeals to loyal alumni, devoted supporters and to people in general calling for help to keep the wheel of their educational machinery running.

Why this must be is understood by every administrator of a college or university, but why they are constantly approached by well meaning friends who are inquiring as to why you cannot run a college on a business-like basis and make ends meet without constantly having to call upon alumni and friends to see them through.

In a recent article in the "Kiplinger Magazine" entitled "Changing Times" this matter was freely discussed. The article pointed out varied basic facts about college financing.

First, it is better that colleges do not try to break even and that they do depend on gifts to keep going. If the financial program of the college was geared toward breaking even or even to making a profit the cost of educating the average student would become so prohibitive that our schools would become schools for the children of the rich. Second, if they tried to live within their incomes, as many would have them do, they would soon deteriorate. That would be coming down to meet a new standard and a standard very inferior to previous standards. This is not a new situation. It was the same when the oldest of us were in college. No student has ever paid his full way through any college or university. They were all on a hidden scholarship whether they knew it or not. Contributions by some long-forgotten alumnus gave you a far better education than you paid for. And if you won a cash scholarship ten years ago, remember that it would be worth only half of that amount today.

In the old days contributions used to come to colleges in large chunks from a relatively few philanthropists. Then endowment funds could be safely invested at rather high interest rates. Today, because of steep income taxes the big gifts are becoming fewer and fewer. Then, too, interest rates are down. Many a college that once got 5 per cent is now getting only 3 per cent in some cases 2½ per cent. To make it worse the price of everything the college uses has gone up while this endowment yield has been going down; witness the price of all the college uses from coal to ink. Then buildings need to be repaired and the price is in many cases prohibitive. Facilities are dreadfully over-worked and are certainly underpaid. When you consider the salary of an adequately trained college professor, (accord-

ing to the standards of the Accreditation groups) and all the time that has been put into his training and the demand upon him for continual training and summer schooling, we can see a salary that is pitifully small.

A business man would face such a problem by raising the price of his product and strive for a bigger volume to cut the cost per unit but this a college cannot do. If it were done the cost of education would deprive many deserving students from attending school. After all, the colleges are in the business of trying to make a better world by trying to make better people, more informed, more challenged to want to help build that world.

Take the case of High Point College for instance. It operates on an endowment of approximately \$47,139 which yields an annual income in the neighborhood of \$15,705. This money goes into the general fund to run the school, out of which fund comes the total program of the school, including salaries of faculty members, etc.

Now as to High Point College's student income. The average income from each student at High Point College for the past academic year was \$304.00 not including room and board. The average cost to educate each of these students last year was \$366 not including room and board. Now where does that

extra \$62.00 per year, per student come from? That is where the endowment fund enters the picture.

We see that student tuition fees actually cover only about 83 per cent of the total cost. The other 17 per cent which is used for operating expenses, for "breaking even" there must be another income over and above this for the additions that are necessary to the physical equipment of the institution. Competition sometimes becomes keenest among competing schools and the schools with superior equipment are in a more favorable position.

Therefore, we need to remember our colleges and put them in our personal budgets along with the other great needs of the community. You, yourself, got a better education than you paid for. Others

Old Time Mill Still Operates

MILLINGTON, Md. — (P) — Time hasn't been able to do much more than gnaw up a set of grinding stones at the old Millington Mill. Severely, under its seventh owner, the mill pursues the plied business started 186 years ago when Thomas Gilpin built it with bricks imported from England.

The structure has three stories, with beams roughly hewn from tree trunks, fastened with wooden pegs. One of the thick timber beams in the center of the first floor ceiling shows a long gash down the side, a memento of the

war of 1812. The mill was used as a granary then and the gash was produced by overloading the second floor with grain.

Ex-GI Robert O'Dell is the current owner of the venerable mill. O'Dell and his brother Dorn now grind out flour and corn meal for the farmers and villagers of Maryland's seacoast and withdrawn Eastern Shore in much the same fashion as the generations of millers before them.

To save time and trouble wash your lemon squeezer, egg beater, grater or wire potato masher right after using. Use cold water for the egg beater.

can get the same thing today only with your help.

VIEW OF ROBERTS HALL: Here's a familiar scene, a view of Roberts Hall, where all activities of the college are centered.

College Has Strong Faculty

(MORE ON PAGE 26)

ner Paschal, Director of Physical Education for Men, whose B. S. and M. S. degrees are from institutions in Oklahoma.

Influences from several Middle Atlantic states, New York, Maryland, and Pennsylvania, are probably greater than is at first evident. Eight members of the faculty, as already indicated, pursued graduate studies at Columbia: Dr. Clowes, Dr. Driver, Dr. Hinshaw, Miss Idd, Miss Johnson, Mrs. White, Mr. Withers, and Mr. Wood; and two members received advanced degrees from New York University, Mrs. Berry and Miss Johnson. Mr. Mourane is a native of New York State.

It is from Western Maryland College that Dean Hinshaw and Dean Lindley received their Litt. D. degrees. Miss Helen R. Bartlett, Professor of History, a Marylander, did her undergraduate work at Western Maryland and received her Ph. D. degree from the University of Maryland. Although Mr. Albert J. Wood, Associate Professor and Head of the Department of Music, took his B. S. and M. A. degrees at Columbia, his home is Baltimore.

Dr. Richard C. Todd of the History Department is a Pennsylvanian whose study for the B. S. and M. Ed. degrees was in his native state and for the Ph. D. at Duke University.

Several members of the faculty bring to the college influences from New England combined with other sections. Dr. Edmund O. Cummings, Professor of Chemistry and Head of the Department, a North Carolinian, who has his B. S. degree from the University of North Carolina and who taught at the Georgia Institute of Technology, took his Ph. D. degree at the Massachusetts Institute of Technology, Dr. Lincoln Lorenz, Professor of English and Head of the Department, born in Pennsylvania and formerly resident in the states of New York and Maryland, received the A. B. and A. M. degrees at Harvard and the Ph. D. degree at Stanford; he taught in several colleges and universities, including Western Maryland. Mrs. White, previous mention is a New Englander who received her first degree, the A. B., from Boston University.

The comprehensive scope of the faculty in environment, training, and experience is a key to its excellent powers for preparing the students of High Point College to make their lives increasingly valuable to themselves and to society. It has been seen that the influence of the faculty members radiates from a core of cultural, intellectual, and spiritual qualities in North Carolina to the widening effects derived from the neighboring states of South Carolina, Virginia, and Tennessee, the Far South, the Middle West, the Southwest, New England, and even foreign countries. There should be confidence that the accomplished faculty will be leaders in building a greater college in both numbers and higher standards of scholarship, culture and character.

Farm Housing Survey To Start Monday Morning

RALEIGH, Feb. — (AP) — On Monday, a group of specially-trained enumerators will launch farm housing survey in 14 North Carolina counties.

The group concluded a three-day instruction course at the State Department of Agriculture here yesterday.

The date to be gathered will provide a record of farm construction and will show the quality of farm housing and facilities as related to farm family income.

The information will be used by groups interested in bettering agricultural organizations.

Cliff Wakefield, a federal-state agricultural statistician, will supervise the project.

Bronx Zoo, New York, operates the world's largest earthworm factory, to feed its duck-billed platypuses.

The U. S. Marine Corps was founded November 10, 1775, in Philadelphia.

REGISTRATION: When registration time rolls around it means a lot of activity at the college. Pictured is a scene taken as stu-

dents get their names on the dotted line.

College Student To Be Credited To Seat Of College

WASHINGTON, Feb. — (AP) —

College students will be credited to the population of their college cities rather than their home cities in this year's census.

Census officials announced the plan, saying it would provide "more realistic" data. They said reasons for changing from the former system of crediting students to their home city population include:

1. Students reside in their college city for a greater part of the year than in home cities.

2. With most colleges now operating summer schools, college town populations do not have the abrupt summer drop in population they formerly had. Students actually swell the number of residents on a year-round basis.

3. Businessmen, from manufacturers to retailers, use census figures in determining advertising and sales quotas, etc. Thus quotas

for college cities would be more realistic if the students in residence were counted.

4. While college city populations are noticeably increased by crediting the whole student body to them, home town population counts are not decreased much because each loses only a few students.

President Says He Respects Red Lights

WASHINGTON, Feb. — (AP) — President Truman whizzed through 20 red lights on a four-mile drive to the big Democratic dinner.

It was all perfectly legal, because his car had a police and secret service escort. Traffic regulations are waived under such circumstances on the theory that a police officer carries more authority than a traffic signal.

But only 24 hours earlier, Mr. Truman had told a national crime conference:

"I never go through red lights, despite the prerogatives attaching to the presidency."

Best Wishes To
HIGH POINT COLLEGE
And Your New President
DR. DENNIS H. COOKE

We are indeed happy to have furnished you with window shades and venetian blinds for the past 15 years.

CONGRATULATIONS TO HIGH POINT COLLEGE UPON THE INAUGURATION OF DR. DENNIS H. COOKE AS PRESIDENT

We extend our heartiest best wishes for your continued growth and prosperity.

Chemistry Department In Good Spot

By DR. E. O. CUMMINGS
Professor of Chemistry

Location of High Point College in such an important industrial area and in a city of such industrial leadership, gives exceptional opportunity for the department of chemistry to prove of very practical service in research and performance.

Virtually every industry in both High Point and North Carolina is dependent in some measure on the principles of chemistry. Hence the standards in this department at High Point College are higher than those of most small colleges, and equal those of the larger southern colleges. The academic requirements of the American Chemical Society for the training of professional chemists are fully met.

Furthermore, the chemistry student at High Point College is enabled to obtain practical experience in the plants located here, while attending college. This is an opportunity no other college in North Carolina offers.

Due to the need for industrial chemists of high calibre in this area, the chemistry department places considerable emphasis upon the courses in industrial chemistry, paint and industrial finishes, and industrial research. A large part of the laboratory-work in the courses in paint and industrial finishes and industrial research is carried on in local plants under actual plant conditions.

The course in paint and industrial finishes consists of a study of house paints, industrial maintenance paints, varnishes, lacquers, and stains. It is the only course of its kind offered in the south.

In this course students study the chemistry of the different constituents of finishes. Then for laboratory work they formulate and manufacture the respective finishes using regular factory equipment. Then finishes are applied and thoroughly tested. It would be impossible to give this course unless the college was located close to the industries and unless the industries cooperated to the fullest extent.

The course in industrial research is open to seniors. The student may

work upon any industrial problem that appeals to him. During the last year students worked upon problems in house paints, lacquers, stains, textile detergents, dairy detergents and bleaches. In all the problems the students worked both in the laboratories at the college and in the laboratories and plants of the industries located in High Point and Greensboro.

It has been found that information and experience thus obtained makes the theoretical subject matter far more interesting for the student. Furthermore, after graduation it has been found that the students obtain better paying positions due to the fact that they have obtained practical experience along with the theoretical.

These courses are taught by Dr. E. O. Cummings, head of the Chemistry Department at High Point College. He received his degree of B. S. in Chemistry from the University of N. C., and a Ph. D. in Chemistry from The Massachusetts Institute of Technology. Num-

eros patents in the field of pigments and paints have been obtained by him, and during the war he directed research for the Marietta Paint & Color Co. He is a member of the American Chemical Society, and recently was elected Counselor of the Central Section of the American Chemical Society of North Carolina. He is also president of the Carolina Paint & Chemical Co.

Kiddie Cooler

EAST Springfield, Mass., Feb. 19.—(INS)— You won't have to boost Junior any more when he wants a drink at an electric water cooler. Now he can help himself at a "small fry fountain" which Westinghouse has just started to supply. Mounted half way down the side of a standard water cooler, the small fry water bubbler may be operated at the same time as the adult height bubbler.

Almost one fourth of Holland is below sea level.

THEY SING AT HIGH POINT COLLEGE: No college is a college if it doesn't have a choir. Pictured is the choir of High Point

college. The singers are recognized among the best in this section.

Contribution During War Stands Out In History

By ARTHUR S. WITHERS
Professor of English,
High Point College

When war came, High Point College quickly offered her facilities and her services to the government. A detachment of aviation students was assigned to the college and on April 5, 1945, the boys arrived on the campus, singing lustily their "Roll Out the Barrel" and other favorites. For over a year—until late June of 1944—the 326th C.T.D. maintained a quota of approximately 200 trainees. Records show that during this period 753 men were put through their prescribed program—or "processed."

The military features of the program were handled by the detachment officers, but the various academic courses were in the hands of the regular High Point College faculty members. Young men from all over the country assembled in "squadrons" and marched into the classrooms for instruction in English, history, mathematics, physics, geography, and other practical subjects.

Potential Officers

Thus the College helped prepare and held as a reserve a goodly number of potential officers for the Air Corps. The work done was, so far as possible, on a college level; and thus, in addition to serving its immediate purpose, offered material for later transfer towards a regular college degree. Without known exception, the aviation students as they went through their more advanced training looked back with gratitude and pleasant memory to their stay at High Point College.

To serve is not necessarily to sacrifice. There is little doubt that the College gained from the experience fully as much as it lost. The intensive military program tended to speed up unduly that of the 247 regular students who attended during the year: many of the teachers carried a very heavy load; and adjustments between the military and civilian phases of the program were frequently necessary and not always easy. On the other hand, the coming of the 326th C.T.D. was a financial boon; the diversified talents and experiences of the men who had come from many sections of the country gave a broader outlook to all; and the high spirits and good nature of the boys did much to keep up College

morale during a very difficult time.

Plaque in Foyer

A contribution about which there can be no question is suggested by the plaque that hangs in the foyer of the main building. No comment is needed beyond those words and these names appearing on the plaque:

"This memorial dedicated by High Point College, class of 1945, to honor our former students who gave themselves in service and sacrificed for God and Country."

In Memoriam

C. Wilson Hollowell III, James A. Jacobs, Frank A. Morton, Jr., Jack H. Gibson, Clyde H. Bass, John F. Thompson, John M. Stasulli, James E. Daniels, Harlan L. Reid, Martin G. Spinelli, Fred C. Whitehead, William S. Davis, Randall N. White, Malcolm D. Riley, M. Banks Hamilton, P. H. Scarborough, Jr., Albert D. Ridge, Jr., William H. Davis, Jr., George E. Humphreys, Melville W. Odom, Thomas W. McCarthy, Edwin G. Watkins, A. Tennis Humphrey, Richard E. Rozzelle, Gilbert W. Clark, Jr., Robert A. Rogers, Alpheus W. White, G. Edward Knight, Jr., Arthur J. Ocorr, Eugene M. Connelly, James C. Varner, Earl Martin Brown.

In addition to these who gave "the last full measure of devotion," there were others who were willing to do as much. No doubt they would have answered the call wherever they were, but the High

High Point College

AND YOUR NEW
PRESIDENT

Dr. Dennis H. Cooke

W. K. Silver
Incorporated

THE COLLEGE
MAN'S STORE

Salute To:

**AN ADVANCING INSTITUTION
A DISTINGUISHED LEADER**

AGAIN High Point College erects a milestone on its highway of steady advancement.

Since the days when the college was but a hope, and through these twenty-five years of progress, High Point industry has held unwavering trust in the ideals and purposes on which the college was founded. We feel pride in having joined with so many other persons and groups in helping make the original home a dynamic reality.

On this inaugural occasion High Point manufacturers extend the hand of congratulation to college authorities, and of fellowship and confidence to the new president, Dr. Dennis Hargrove Cooke, able educator and experienced administrator.

President Cooke's genius and vision point unerringly to uninterrupted progress on the part of High Point College. We have full faith in its increasing stature in higher educational service, and ever-broadening importance to High Point, state and nation, under his talented leadership.

ASSOCIATED, INDUSTRIES, Inc.

An Association of High Point, Thomasville and Jamestown Manufacturers

Dedicated to the Well Being of Industry and All Associated Therewith

Salute To

AN ADVANCING INSTITUTION A DISTINGUISHED LEADER

Admit High Point College another milestone in its history of twenty-five years.

From the day that the college was born a hope, and through these twenty-five years of growth, that hope always has been growing. Just as the seeds and saplings in which the college was founded. We feel pride in having found still in these little persons and groups helping with the original hope a distinctly college.

For this hundredth anniversary High Point has demonstrated a record of achievement in college activities and of scholarship and continues to the new frontier. In these fifty years, this college has represented college growth.

Whether student or staff, this college is a community of people in the spirit of High Point College. We have to it built as its founding vision in higher education with confidence-building experience in High Point, with confidence, with the national leadership.

SOMETHING TO READ: President Cooke is shown in his library getting himself "something to read." Books on the lower shelf to the right were written by Dr. Cooke.

Alumni Scattered Over All Parts of the World

Scattered over the United States and over the world are the 1700 graduates of High Point college. The College may well be proud of their accomplishments, for they have brought and are still bringing honor and distinction to the 25 year-old institution. There have been 22 graduating classes, ranging in number of graduates from 33, 10 women and 3 men, in 1927; to 32 women and 12 men, in 1949. Through the years, of the 1700 graduates, approximately 1100 are serving in 138 towns and communities of North Carolina, and the remaining number are found in 33 states, the District of Columbia, Canada, Puerto Rico, Venezuela, Germany and Japan. High

Point claims 265; Winston-Salem, 96; Greensboro 68; Asheville, 41; Durham, 25; Charlotte, 22; Burlington, 21; and Chapel Hill, 16. Among the 33 states the greater number are found in Virginia, New York, New Jersey, Pennsylvania, Florida, South Carolina, Maryland, Georgia, West Virginia and the District of Columbia. From the other states and the foreign countries the numbers range from 1 to 9.

In the early years of the College the number of women graduates exceeded the number of men graduates by approximately 3 to 1, but since 1945 the number of men graduates have exceeded the number of women graduates by 4 to 1.

In the field of service there are approximately 1000 teachers, representing the various fields of English, history, science, biology, chemistry, mathematics, music, physical education, speech and business subjects. Approximately 300 ministers fill the pulpits to the Methodist and other churches. Many scientists, research workers, noted doctors, dentists and lawyers began their work at High Point college. Many are now located in High Point.

During the World War II approximately 73 were enrolled in the College Training 326 detachment of the Army Air Forces from April 1945, to June, 1944. Under the GI Bill approximately 553 have been enrolled at High Point College. How many of these may be counted as full dedicated alumni is yet to be determined.

Of the 1700 students of the College which we may call alumni, 34 responded to the colors and paid the supreme sacrifice.

Oh Yeah

BOULDER, Colo., Feb. —(AP)— The Colorado University counseling service reports that romance is far down the list of psychological difficulties troubling students. Counseling service records list choosing a major as the biggest problem, then motivation and problems of personal adjustment. Sexual difficulties comprise only a fraction of the difficulties which the counseling service tries to un-

Says Broken Home Caused Her To Give Up Children

LOS ANGELES, Feb. —(AP)— Rather than see her children grow up in a broken home — as she did — Mrs. Barbara Jean Hanford, 20, gave them up before getting a divorce.

She obtained a divorce from Robert P. Hanford, 23, yesterday and told the court that she had given up their children, Lauren, two, and Daryl, nine months, for adoption several months ago.

"My own mother and father were divorced when I was nine," Mrs. Hanford told Superior Judge Samuel R. Blake. "It is not a happy life for a child. I think it will be better for them to be brought up in happy homes with parents who love and respect each other."

The children are in separate homes, but live near each other; later they will know they are brother and sister, Mrs. Hanford said, adding: "I can find out at any time how they are, but I will not see them."

"You have made a great decision — it is not for me to say whether you are right or wrong," said Judge Blake. He gave her legal custody of the children until the adoptions are completed, and ordered the father to pay \$60 a month temporary support.

King of the Hoboes Loses Credentials

SAN FRANCISCO, Feb. — Jeff Davis, king of the hoboes, has been stripped of his "credentials."

"My feet's just tied with all that stuff gone," Jeff complained. He listed these losses: some 256 honorary cards, including thumb-screwed testimony of his long

reign over America's Knights of the Road assorted photographs and a railroad spike, which he described as golden.

"When I go 'round the country," said the 67 year-old hobo, "they won't even know it's Old Jeff 'less I have them papers."

Congratulations ..

— it is our desire to see this progressive Methodist institution go forward under the guidance of its third president, Dr. Cooke.

With a watchful eye and a warm place in our hearts for High Point College we have grown much like you have, our 25 years in Real Estate activity is much like you 26. Just building, just growing, just trying to do a good job and liking it. We look forward to you at the college of doing even a better job in the years that follow.

Hillcrest Manor Apartments

HILLCREST MANOR, High Point's newest apartment project just recently completed has made available sixty colorful apartments of two bedrooms each and sixteen apartments consisting of one bedroom each. The most modern and comfortable living which can be provided. This one project alone, situated where housing was most needed has proven to us we are supplying housing for further High Point College expansion.

Sherwood Village

SHERWOOD VILLAGE one of the largest housing projects in High Point history envelopes a cross section of our city's working people, truly a village of community spirited people. The homes in Sherwood Village are all new and modern in design and represent a million and a half dollars in value—another proved housing supply that will take care of our college expansion.

Congratulations

to

HIGH POINT COLLEGE

On the Installation of
Dr. Dennis H. Cooke
as the school's
third President

From a student body of 134 in 1924, to the present enrollment of 746—Yes, High Point College is truly progressing.

Biology Course Balanced To Keep Pace With Times

By DR. BEN T. HILL,
Head of Biology Department
and
NICHOLAS ANTONAKOS,
Instructor of Biology, HPC

The Department of Biology of High Point College offers a well-rounded training in modern biology to students of the college. The course in General Biology has grown from a single section in years past to make this the largest of the natural science departments of the college.

The course is so divided that one-fourth of the year deals with Botany, about one-half the year with Invertebrate and Vertebrate zoology and physiology, and the remaining one-fourth of the year deals with paleobiology, genetics, ecology, and other topics that include both plant and animal material. The laboratory work has as its aims not only to present certain materials to be studied and learned but also to develop in each student the ability to observe scientifically and to instill in them a feeling of self-reliance. Standard equipment is provided for each student in the laboratory, including several new microscopes. Abundant specimens are provided for study and display.

From the beginning of the college, premedical work has been emphasized in the biology department. Premedical students take the course in general biology. The principal advanced courses for this group are Comparative Vertebrate Anatomy and Vertebrate Embryology, both courses being taught by Dr. Hill. The anatomy course is standard. In the embryology course, students prepare their own specimens and section of chick embryos. A Spencer microtome is used for cutting sections, and special staining jars and other equipment are provided for this course. The technique is the same as that

used for histology and pathology, so students get training which fit them for work in those fields.

The study of heredity is covered in the course in Genetics, also given by Dr. Hill. This is a study of interest not only to biology majors and premedical students, but also to many students majoring in other fields. For this reason the course in genetics is open to any student of the college above the Freshman level. It takes up not only the questions of human heredity which are of general interest, but also includes mathematical and statistical methods used in the study of commercially important plants, flowers, fish, fowl and beasts.

Bacteriology has been for several years an elective course to round out the training of those students who have as their major the field of Biology. In the past only one course was offered—that being a general survey of the scope of bacteriology—dealing in the microbiology of the air, soil, water, and foods and incidentally into the pathogenicity of the disease producers. The laboratory work entails the proper technique in the isolation, classification and cultivation of microorganisms. This year a new course has been introduced which deals entirely with the pathogens. Because of lack of space the bacteriology classes have been limited primarily to Science and Home Economics majors. It is hoped that in the future a complete course covering the bacteriology of water, milk and foods may be offered. Courses in ecology, field botany and farmistology can be given when there is sufficient demand.

The biology department gives several courses required for students majoring in other departments. Courses in Human Anatomy and Human Physiology are given for student of Physical Education,

CLASS IN BIOLOGY: Here is a class in biology, standing in the background, with Dr. Ben T. Hill, head of the department,

and Hygiene is given for these and for majors in Psychology and Education.

The staff of the Biology Department consists of Dr. Ben H. Hill,

who holds the degrees of A. B. degree of B. S. from Appalachian and M. S. from Texas Christian University, and the Ph. D. from the University of Illinois, and Mr. Nicholas Antonakos who holds the North Carolina at Chapel Hill.

Two Out Of Three Americans Read Newspapers Daily

PHILADELPHIA, Feb. 19.—More than two out of every three persons in the United States spend some time daily reading a newspaper according to N. W. Ayer & Son's directory of newspapers and periodicals.

The agency drew its conclusion after announcing that daily newspaper circulation has reached an all-time high. The directory reported a combined circulation of 52,271,000 and figures that the average copy of a newspaper is read by more than one person.

Other statistics listed by the directory included: The nation's 392 morning papers have a combined circulation of 30,151,000, an increase of more than six per cent since the end of the war.

The 1,498 evening papers have a circulation of 30,911,000, a gain of slightly less than six per cent.

Four all-day newspapers, publishing around the clock, have a circulation of 1,209,000, slightly less than a year ago.

Circulation of Sunday papers has fallen off slightly to 44,730,000 but still is 12 per cent above the distribution four years ago. The number of Sunday papers has increased from 533 to 577 in the last year.

A total of 20,666 newspapers and periodicals are published in the United States. During 1949, 307 new publications were started and 402 suspended operations.

In the weekly field there were 100 new papers added in 1949, bringing the total to 9,774.

Julius Caesar adapted the Julian calendar which is the basis for the current Gregorian calendar from Egypt's calendar.

NO KINGDOM FOR THIS HORSE: At the age of four, Dr. Cooke wouldn't have traded this horse for a kingdom.
